Harper,2006-12-13 The 21st Century brings all new rules Entrepreneurs are challenging conventional wisdom and thinking outside the box One of the first challenges involves challenging the assumption that a business has to be big to be successful While most of the 20th century heralded big businesses it is clear that businesses no longer have to be big to do big business Now it is possible for a handful of people to operate a global business from virtually any place on the planet Today the keyboard has overtaken the boardroom Financial markets alliances and joint ventures have eliminated the need for entrepreneurs to put up substantial capital investments Today s businesses are driven by ideas innovation and execution This book will show entrepreneurs and business leaders will provide CEOs and entrepreneurs with the tools that they will need to become leaders in their market **Shaping Entrepreneurship Research** Saras Sarasvathy,Nicholas Dew,Sankaran Venkataraman,2020-04-21 *Shaping Entrepreneurship Research* Made as Well as Found is

a collection of readings designed to support entrepreneurship research Focused on a worldview in which the future is open ended and shapeable through human action i e made this collection reframes entrepreneurship as a science of the artificial rather than as a natural or social science It posits an open ended universe for the making of human artifacts even if large swathes of nature and society are not within the control of the people making them The book explores the notion of made through 25 foundational readings classics from the history of ideas Organized into five sections each classic is individually introduced by the editors in one of five chapters written to explain its relevance and significance for a made view of entrepreneurship Readers will benefit from exposure to these classic ideas and ongoing research in a variety of areas that fall somewhat outside the line of sight of traditional entrepreneurship research Both individually and collectively the readings suggest opportunities to ask new questions and develop new ways of framing entrepreneurship research that carry the discussion beyond worlds found to worlds made as well as found The book is crafted to be valuable to three groups of scholars young scholars with limited or no access to research infrastructure but with a desire to participate in deep conversations young scholars with access to research infrastructure who also desire to listen in on a different kind of conversation and established entrepreneurship scholars who are contemplating an alternative set of foundational ideas to support their conversations in the discipline

The Entrepreneur Robert Ringer,2012-07-17 It is the government s duty to provide for the general welfare FALSE The growing gap between the rich and the poor proves

that capitalism has failed FALSE The government has the authority to redistribute wealth through regulations and taxes FALSE All men are created equal But not all taxpayers Progressives or Retrogressives as 1 New York Times bestselling author Robert Ringer calls those on the far left who are in reality against progress believe in an all powerful central government that has the authority to meddle in both the economy and in the lives of individual citizens Retrogressives naively believe that the government has a moral obligation to help those in need but nowhere in the Constitution is there an enumerated power to that effect In a Retrogressive utopia life is risk free for everyone But a government that prevents its citizens from failing actually prohibits them from succeeding So called social programs such as food stamps the minimum wage and draconian taxes are designed to redistribute wealth but are lethal to the very people whose success is most critical to this nation s prosperity Entrepreneurs In this provocative new book Ringer examines what it takes for these unsung heroes to succeed in an environment that is increasingly hostile toward small businesses Perhaps the most maligned and beleaguered individuals in the United States Entrepreneurs are the easiest targets for the government s insatiable appetite to exercise control over the economy Yet left alone to do what they do best Entrepreneurs are able to innovate better products and services than the government could ever hope to provide create jobs reinvest much of their profits into expanding their businesses and as a result grow the economy and thereby improve the lives of millions of people through the self regulating invisible hand of the marketplace The time has come for Americans to tell politicians they don t want any more quick fixes What we need is for government to get out of the way and allow the Entrepreneur to move our country forward
