Making Majorities:

Making Majorities Dru C. Gladney, 1998 Majorities are made not born This book argues that there are no pure majorities in the Asia Pacific region broadly defined nor in the West and challenges the thesis that civilizations are composed of more or less homogeneous cultures The 14 contributors argue that emphasis on minority majority rights is based on uncritically accepted views of purity numerical superiority and social consensus *Mexico-United States Interparliamentary Conference*, 1999 Majorities, Minorities, and the Future of Nationhood Liav Orgad, Ruud Koopmans, 2022-11-24 The design of democratic institutions includes a variety of barriers to protect against the tyranny of the majority including international human rights cultural minority rights and multiculturalism In the twenty first century majorities have re asserted themselves sometimes reasonably referring to social cohesion and national identity at other times in the form of populist movements challenging core foundations of liberal democracy This volume intervenes in this debate by examining the legitimacy of conflicting majority and minority claims Are majorities a legal concept holding rights and subject to limitations How can we define a sense of nationhood that brings groups together rather than tears them apart In this volume world leading experts are brought together for the first time to debate the rights of both majorities and minorities The outcome is a fascinating exchange on one of the greatest challenges facing liberal democracies today Institutions For Future Generations Iñigo González-Ricoy, Axel Gosseries, 2016-12-15 In times of climate change and public debt a concern for intergenerational justice should lead us to have a closer look at theories of intergenerational justice It should also press us to provide institutional design proposals to change the decision making world that surrounds us This book provides an exhaustive overview of the most important institutional proposals as well as a systematic and theoretical discussion of their respective features and advantages It focuses on institutional proposals aimed at taking the interests of future generations more seriously and does so from the perspective of applied political philosophy being explicit about the underlying normative choices and the latest developments in the social sciences It provides citizens activists firms charities public authorities policy analysts students and academics with the body of knowledge necessary to understand what our institutional options are and what they entail if we are concerned about today s excessive short termism **The Cultural Defense of Nations** Li'av Orgad, 2015 Addressing one of the greatest challenges facing liberalism today this book asks if it is legally and morally defensible for a liberal state to restrict immigration in order to preserve the cultural rights of majority groups Orgad proposes a liberal approach to this dilemma and explores its dimensions justifications and limitations Rethinking the Union of Europe Post-Crisis Giandomenico Majone, 2014-04-24 Provocative and timely examination of European integration and the specific methods that lead to a hazardous monetary union Includes a deeper investigation of the specific crisis of monetary integration and argues how integration might be more effectively achieved with inter jurisdictional competition Minority Accommodation through Territorial and Non-Territorial Autonomy Tove H. Malloy, Francesco

Palermo, 2015-10-08 *Minority Accommodation through Territorial and Non Territorial Autonomy* explores the relationship between minority territory and autonomy and how it informs our understanding of non territorial autonomy NTA as a strategy for accommodating ethno cultural diversity in modern societies While territorial autonomy TA is defined by a claim to a certain territory NTA does not assume that it is derived from any particular right to territory allocated to groups that are dispersed among the majority while belonging to a certain self identified notion of group identity In seeking to understand the value of NTA as a public policy tool for social cohesion this volume critically dissects the autonomy arrangements of both NTA and TA and through a conceptual analysis and case study examination of the two models rethinks the viability of autonomy arrangements as institutions of diversity management This is the second volume in a five part series exploring the protection and representation of minorities through non territorial means examining this paradox within law and international relations with specific attention to non territorial autonomy NTA *Political Theory and the European Union*

Michael Nentwich, Albert Weale, 2003-09-02 The contributors to this book examine the issues of constitutional choice that face the governments and citizens of today s Europe Divided into three sections this study addresses questions of political legitimacy and the meaning of democratic deficit in the EU the reality of what institutional reforms and decision making processes are possible and the rights of citizenship and values that should be protected *Making Devolution Work for Service Delivery in Kenya*

Abdu Muwonge, Muratha Kinuthia, Timothy Stephen Williamson, Christine Owuor, 2022-02-23 Kenya adopted a new Constitution and began the process of devolution in 2010 The new Constitution was the institutional response to longstanding grievances over the centralization of state powers and public sector resources and regional disparities in service delivery and development outcomes This radical restructuring of the Kenyan state has three main objectives decentralizing political power public sector functions and public finances ensuring a more equitable spatial distribution of resources between regions and promoting more accountable participatory and responsive government at all levels The first elections under the new Constitution were held in 2013 Alongside the national government 47 new county governments were established Each county government is made up of a County Executive headed by an elected Governor and works under the oversight of an elected County Assembly Seven years after the devolution train left the station this report takes stock of how devolution has affected the delivery of devolved basic services to Kenyan citizens Whereas devolution was driven by political reform the ensuing institutions and systems were expected to deliver greater socioeconomic equity through devolved service delivery The Making Devolution Work for Service Delivery MDWSD study is the first major assessment of Kenya s devolution reform The study was a jointly coordinated effort by the Government of Kenya and the World Bank The study provides key messages with respect to what is working what is not working and what could work better to enhance service delivery based on the currently available data It provides an independent assessment of service delivery performance in five sectors namely health education agriculture urban and water services and includes an in depth review of the main pillars of devolved service

delivery namely public financial management intergovernmental finance human resource management politics and accountability

The Function of Proportionality Analysis in European Law Tor-Inge Harbo, 2015-03-20

The proportionality principle has become ever more important in European law and elsewhere. The career of the principle has attracted considerable attention from legal practitioners, legal theorists and political scientists alike, but the debate so far has been quite fragmented. In this new book, the author offers a broad and systematic analysis of the proportionality principle. Discussing and comparing proportionality analysis as applied by European courts, in part one of the book, the author proceeds to contrast proportionality analysis with alternative assessment schemes. In the third part of the book, the author reaches beyond doctrinal reconstructions as he deciphers the functions of proportionality jurisprudence. In view of the various facets of proportionality analysis, the author departs from the asserted infringement of a legally protected position by some regulatory act, proceeds to discuss the legitimacy of this intervention and undertakes an analysis of its suitability, appropriateness and necessity. According to the author, the safe grounds of proportionality—means, ends, rationality—do not suffice where the legitimacy of an infringement has to be assessed, where conflicting values have to be balanced or where courts engage in a proportionality analysis *stricto sensu*. In the concluding remarks, the author proposes how proportionality analysis may be structured in order to better secure the legitimacy of the analysis.
