Making Markets Opportunism And Restraint On Wall Street:

Making Markets Mitchel Y. Abolafia, 2001-10-30 In the wake of million dollar scandals brought about by Michael Milken Ivan Boesky and their like Wall Street seems like the province of rampant individualism operating at the outermost extremes of self interest and greed But this Mitchel Abolafia suggests would be a case of missing the real culture of the Street for the characters who dominate the financial news *Making Markets* an ethnography of Wall Street culture offers a more complex picture of how the market and its denizens work Not merely masses of individuals striving independently markets appear here as socially constructed institutions in which the behavior of traders is suspended in a web of customs norms and structures of control Within these structures we see the actions that led to the Drexel Burnham and Salomon Brothers debacles not as bizarre aberrations but as mere exaggerations of behavior accepted on the Street Abolafia looks at three subcultures that coexist in the world of Wall Street the stock bond and futures markets Through interviews anecdotes and the author's skillful analysis we see how traders and New York Stock Exchange specialists negotiate the perpetual tension between short term self interest and long term self restraint that marks their respective communities and how the temptation toward excess spurs market activity We also see the complex relationships among those market communities why for instance NYSE specialists resent the freedoms permitted over the counter bond traders and futures traders *Making Markets* shows us that what propels Wall Street is not a fundamental human drive or instinct but strategies enacted in the context of social relationships cultural idioms and institutions a cycle that moves between phases of unbridled self interest and collective self restraint

Making Markets Making Place Benjamin Coles, 2021-05-03 This book examines place and place making in London's Borough Market In particular it uses topography place writing to interrogate the ways in which Borough Market's material social sensual and discursive relations assemble to reproduce Borough Market as a place market and marketplace Its central premise is that market processes the negotiation and exchange of commodities are place processes This means that the often abstract relationships that ultimately define what we think of as the economy are embedded in the rich and every materiality sociality sensuality and meanings associated with place By tracing out these different elements topography illustrates the ways in which economic reproduction is grounded in particular and often discrete practices However by assembling them together this highlights the ways in which place and place making are the driving force behind the economy at large

Markets in Fashion Patrik Aspers, 2012-10-02 Interest in contemporary

cultural industries has grown in the past decade as they take on a greater significance in our increasingly consumer led society Focusing on the world of fashion photography this book presents an interdisciplinary approach in which this and other aesthetic markets such as advertising modelling art music and more can be viewed The main thrust of this groundbreaking book is in developing a theory for these cultural markets characterized by insecurity and where status and aesthetic diversity generate order and price differentiation In these industries services and products are offered that are a mix of the aesthetic and the economic and for fashion photographers such as those studied here it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists and therefore cannot be considered using such modes of analysis Instead Aspers conducts his study using empirical phenomenology an original approach presented here for the first time which can be easily used in other empirical studies He draws on original empirical material participant observation and interviews generated in New York and Stockholm which bring a depth of analysis and a relevance to this book which academics researchers and those with a vested interest in such industries will value Written by one of the world s brightest young economic sociologists this fascinating book previously published in Sweden and enthusiastically received is endorsed by recognized industry authorities A noteworthy book it provides a foothold in the burgeoning sub discipline of economic sociology and a significant analysis of the economics of the fashion photography industry

Floor Rules Mark W. Geiger,2024-10-29 A compelling account of how markets really govern themselves and why they often baffle and outrage outsiders One of the reasons many people believe financial markets are lawless and irrational and rigged is that they follow two sets of rules The official rules set by law or by the heads of the exchanges exist alongside the unofficial rules or floor rules which are the ones that actually govern Break the official rules and you may be fined or jailed

break the floor rules and you ll suffer worse you will be ostracized Regulations vary across markets but the floor rules are remarkably consistent This book offering compelling stories of market disturbances in which insider rules played a key role shows readers without excessive moralizing how markets really govern themselves It is a study of the norms customs values and operating modes of the insiders at the center of the financial markets that trade money stocks bonds futures and other financial derivatives The core insiders who rule trading markets are a relatively small group who exert disproportionate influence on financial systems Mark W Geiger examines the historical roots of the culture of financial markets describes the role insiders play in today s high finance and suggests where this peculiar ingrown culture is heading in an era of constant technological change
