Making Medical Choices Who Is Responsible:

Making Health Care Decisions United States. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, 1982 *Making Medical Decisions for the Profoundly Mentally Disabled* Norman L. Cantor, 2009-08-21 A legal and moral analysis of medical decision making on behalf of those with such severe cognitive impairments that they cannot exercise self determination In this book Norman Cantor analyzes the legal and moral status of people with profound mental disabilities those with extreme cognitive impairments that prevent their exercise of medical self determination He proposes a legal and moral framework for surrogate medical decision making on their behalf The issues Cantor explores will be of interest to professionals in law medicine psychology philosophy and ethics as well as to parents guardians and health care providers who face perplexing issues in the context of surrogate medical decision making The profoundly mentally disabled are thought by some moral philosophers to lack the minimum cognitive ability for personhood Countering this position Cantor advances both theoretical and practical arguments for according them full legal and moral status He also argues that the concept of intrinsic human dignity should have an integral role in shaping the bounds of surrogate decision making Thus he claims while profoundly mentally disabled persons are not entitled to make their own medical decisions respect for intrinsic human dignity dictates their right to have a conscientious surrogate make medical decisions on their behalf Cantor discusses the criteria that bind such surrogates He asserts contrary to popular wisdom that the best interests of the disabled person are not always the determinative standard the interests of family or others can sometimes be considered Surrogates may even consistent with the intrinsic human dignity standard sometimes authorize tissue donation or participation in nontherapeutic medical research by profoundly disabled persons Intrinsic human dignity limits the occasions for such decisions and dictates close attention to the preferences and feelings of the profoundly disabled persons themselves Cantor also analyzes the underlying philosophical rationale that makes these decision making criteria consistent with law and morals Making Medical Choices Jane Stein, Jane J. Stein, 1978 The central theme of this book is that technological advances in medicine have created a multitude of choices for each individual choices that can influence how we live and die These choices are difficult ones and the book provides a better understanding of the issues Thus the implications of each choice become clearer Such decisions remain inherently very difficult and personal Thoughtful compassionate societies must consider these difficult problems Can we develop mechanisms to assist in the medical choices that will inevitably take place throughout each individual's life Jane Stein makes a stimulating effort to clarify these subjects in this book She calls to attention problems we would prefer to avoid touches the untouchable and in so doing contributes to a constructive debate on the future of human life Preface *Making Health Care Decisions: Appendices* United States. President's Commission for the Study of Ethical Problems in Medicine and Biomedical and Behavioral Research, 1982

Medical responsibility in the choice of anaesthetics, with a table of the anaesthetic employed ... in nearly fifty large

hospitals, etc Henry Macnaughton JONES,1876 **Making Medical Spending Decisions** Mark A. Hall,1997 This book explores the making of health care rationing decisions through the analysis of three alternative decision makers patients paying out of pocket officials setting limits on treatments and coverage and physicians at the bedside Hall develops this analysis along three dimensions political economics ethics and law The economic dimension addresses the practical feasibility of each method The ethical dimension discusses the moral aspects of these methods while the legal dimension traces the most recent developments in jurisprudence and health law Prison Inmates in Medical Research United States. Congress. House. Committee on the Judiciary. Subcommittee on Courts, Civil Liberties, and the Administration of Justice,1976 **Making Health Care Decisions: Appendices: Empirical studies of informed consent** United States.
