identified in this study provide some empirical support and insight into the strengths and weaknesses found in one case study. The findings revealed positive correlation in many of the researched areas within each hypothesis in the relationships and perceptions between team leaders and team members. However, the findings also indicated considerable negative correlation within one of the dimensions: the demonstration of sufficient technical know-how, which was actually expected to be one of the strongest. Overall, it is concluded that this research has made an important contribution towards defining how a leader creates and handles an effective unexploded ordnance team. The findings of this study should be beneficial to team leaders and contribute to improvement of UXO team leadership techniques.
