Making And Breaking Governments Cabinets And Legislatures In Parliamentary Democracies:

Making and Breaking Governments Michael Laver, Kenneth A. Shepsle, 1996-01-26 Making and Breaking Governments offers a theoretical argument about how parliamentary parties form governments deriving from the political and social context of such government formation its generic sequential process Based on their policy preferences and their beliefs about what policies will be forthcoming from different conceivable governments parties behave strategically in the game in which government portfolios are allocated The authors construct a mathematical model of allocation of ministerial portfolios formulated as a noncooperative game and derive equilibria They also derive a number of empirical hypotheses about outcomes of this game which they then test with data drawn from most of the postwar European parliamentary democracies The book concludes with a number of observations about departmentalistic tendencies and centripetal forces in parliamentary regimes

Parliaments and Government Formation Bjørn Erik Rasch, Shane Martin, José Antônio Cheibub, 2015 This volume explores the role of national legislatures in shaping government formation in parliamentary regimes

The Oxford Handbook of Latin American Political Economy Javier Santiso, Jeff Dayton-Johnson, 2012-04-11 Latin America's recent development performance calls for a multidisciplinary analytical tool kit This handbook accordingly adopts a political economy perspective to understand Latin American economies This perspective is not new to the region indeed this volume consciously follows the approach pioneered by political economist Albert O Hirschman a half century ago But the nature of the political and economic processes at work in Latin America has changed dramatically since Hirschman's critical contribution Military dictatorships have given way to an uneven democratic consolidation agricultural or primary product producers have transformed into middle income diversified economies some of which are leading examples of emerging markets So too the tools of political economy have developed by leaps and bounds It is therefore worthwhile to take stock of and considerably extend the explosion of recent scholarship on the two way interaction between political processes and economic performance A unique feature of the book is that it begins with a group of chapters written by high level academic experts on Latin American economics and policies who also happen to be current or past economic policy makers in the region including Fernando Henrique Cardoso former president of Brazil Andrés Velasco former Chilean finance minister Luis Carranza former Peruvian finance minister Martín Redrado former governor of the Argentina central bank and Luciano Coutinho president of Brazil's national development bank These contributors draw upon their academic expertise to understand their experience in the trenches of policy making

The Europeanisation of Parliamentary Democracy Katrin Auel, Arthur Benz, 2006-05-04 This groundbreaking new study shows how the process of creating an ever closer European Union affects not only the policy making but also the politics and polity of the Member States Empirical studies on the domestic impact of Europe identified different forms of Europeanization due to alternative mechanisms of internalising the new norms and rules Although many studies have since focused on the question of how to what degree in what direction at what pace and at what point of time Europe matters the Europeanization of one particular structural determinant of the Member States namely the system of parliamentary democracy is still under researched This is all the more astonishing as democracy in the EU depends to a large extent on the democratic legitimacy of procedures at the national level This volume addresses the key issue of the Europeanisation of parliamentary systems and thus contributes to the ongoing debate on the parliamentary dimension of the European Union It brings together theoretical concepts as well as cross national empirical research on the Europeanization
