A Philosophy of Comparisons Hartmut von Sass, 2021-09-09 Comparing is one of the most essential practices in our everyday life as well as in science and humanities In this in depth philosophical analysis of the structure practice and ethics of comparative procedures Hartmut von Sass expands on the significance of comparison Elucidating the ramified structure of comparing von Sass suggests a typology of comparisons before introducing the notion of comparative injustice and the limits of comparisons He elaborates on comparing as practice by relating comparing to three relative practices orienting describing and expressing oneself to unfold some of the most important chapters of what might be called comparativism This approach allows von Sass to clarify the idea of the incomparable distinguish between different versions of incomparability and shed light on important ethical aspects of comparisons today Confronting the claim that we are living in an age of comparisons his book is an important contribution to ideas surrounding all encompassing measurements and scalability and their critique

Incommensurability and its Implications for Practical Reasoning, Ethics and Justice Martijn Boot, 2017-06-27 If values conflict and rival human interests clash we often have to weigh them against each other However under particular conditions incommensurability prevents the assignment of determinable and impartial weights In those cases an objective balance does not exist The original thesis of this book sheds new light on aspects of incommensurability and its implications for public decision making ethics and justice Martijn Boot analyzes a number of previously ignored or unrecognized concepts such as incomplete comparability incompletely justified choice indeterminateness and ethical deficit concepts that are essential for comprehending problems of incommensurability Apart from problematic implications incommensurability has also favourable consequences It creates room for autonomous rational choices that are not dictated by reason Besides insight into incommensurability promotes recognition of different possible rankings of universally valid but sometimes conflicting human values This book avoids unnecessary technical language and is accessible not only for specialists but for a large audience of philosophers ethicists political theorists economists lawyers and interested persons without specialized knowledge

Practices of Comparing Angelika Eppe, Walter Erhart, Johannes Grave, 2020-06-22 Practices of

comparing shape how we perceive organize and change the world. Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures. Like almost no other human practice comparing pervades all social political economic and cultural spheres. This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration. Its contributions combine case studies with overarching systematic considerations. They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research.

Normative Pluralism Mathea Slåttholm Sagdahl, 2022. The potential conflicts between morality and self interest lies at the heart of ethics. However moral philosophers sometimes think of their task as trying to gain knowledge simply of what we are morally required to do leaving aside the larger normative question of what we ought to do all things considered while others have assumed that what we ought to do all things considered just is what we morally ought to do. Mathea Sagdahl grapples with the more fundamental question of what we ought to do all things considered but argues that there may be no simple answer to this question. Behind the assumption that there is something we ought to do all things considered often lies another undefended assumption that the strength of moral and prudential reasons actually are comparable. Instead of making such an assumption Sagdahl defends a pluralist theory of normativity where morality and prudence form two separate and incommensurable normative standpoints much like Henry Sidgwick's Dualism of Practical Reason. This type of view has tended to be quickly dismissed by its opponents but Sagdahl argues that the theory is in fact well motivated and that the typical objections that tend to target it are much weaker than they are usually considered to be.
