Making Economic Policy In Congress Aei Studies:

Congress and Economic Policy Making Darrell M. West, 2010-11-23 Economic policymaking has perpetually been one of the central dilemmas facing Congress leading to huge budget deficits and disagreements among legislators about spending priorities and tax policies This book examines congressional decision making on economic policy during the Reagan administration It looks at legislative actions on Reaganomics tax reform and the politics of deficit reduction and shows the importance of looking not just at the consequences of these decisions but also at the legislative processes that led to them Using an activist based approach and previously unexamined data Darrell West shows that district activists often more conservative than the public at large exerted a disproportionate and misleading effect on congressional voting When this support eventually proved unstable a more skeptical Congress began to eventually back away from the president's policies This move had serious consequences for deficit reduction and policy initiation and also influenced the final shape of the tax reform package adopted in 1986

Healthy Voices, Unhealthy Silence Colleen M. Grogan, 2007-09-11 Public silence in policymaking can be deafening When advocates for a disadvantaged group decline to speak up not only are their concerns not recorded or acted upon but also the collective strength of the unspoken argument is lessened a situation that undermines the workings of deliberative democracy by reflecting only the concerns of more powerful interests But why do so many advocates remain silent on key issues they care about and how does that silence contribute to narrowly defined policies What can individuals and organizations do to amplify their privately expressed concerns for policy change In *Healthy Voices Unhealthy Silence* Colleen M Grogan and Michael K Gusmano address these questions through the lens of state level health care advocacy for the poor They examine how representatives for the poor participate in an advisory board process by tying together existing studies extensive interviews with key players and an in depth first hand look at the Connecticut Medicaid advisory board's deliberations during the managed care debate Drawing on the concepts of deliberative democracy agenda setting and nonprofit advocacy Grogan and Gusmano reveal the reasons behind advocates often unexpected silence on major issues assess how capable nonprofits are at affecting policy debates and provide prescriptive advice for creating a participatory process that adequately addresses the

health care concerns of the poor and dispossessed Though exploring specifically state level health care advocacy for the poor the lessons Grogan and Gusmano offer here are transferable across issue areas and levels of government Public policy scholars advocacy organizations government workers and students of government administration will be well served by this significant study *A Decade of Deficits* Steven E. Schier, 1992-07-01 Since 1980 the national agenda and the attention of Congress have been focused on federal budget deficits This is the first book however to examine how lawmakers think about fiscal problems and to emphasize individual legislators economic beliefs Based on interviews with 110 members of Congress the book includes an assessment of Congress s capacity to make sound fiscal policy in the future
