onomastics the study of names

Onomastics in Interaction With Other Branches of Science. Volume 1. Keynote Lectures. Toponomastics Urszula Bijak, Paweł Swoboda, Justyna B. Walkowiak, 2023-12-21 Onomastics is an area of scholarly interest that has grown considerably in importance in recent years. Consequently the 27th International Congress of Onomastic Sciences held in 2021 in Kraków, Poland, gathered scholars from all over the world active in all subfields of onomastic enquiry as well as those exploring the areas bordering on other disciplines of the humanities. It thus became a venue for presenting state of the art research in the study of proper names, proposing novel approaches and opening new vistas for future research. The present work is the first of the three volumes of conference proceedings that were the fruit of the congress. Devoted to place naming, it contains 33 contributions by 43 scholars. The language of most of the texts is English, though there are also two papers in German and another two in Russian. The topics range from purely theoretical issues to narrowly focused case studies. The toponyms studied represent a vast variety of types, including the names of countries, districts, counties or municipalities, villages and other settlements, as well as urbanonyms, but also hydronyms, nesonyms or diverse anoikonyms. Some toponyms are examined synchronically, whereas others are viewed in a diachronic perspective. The status of particular place names varies too, from those that have existed since time immemorial, such as river names, to those established relatively recently in human history, as exemplified by the names of bus stops. Many contributions have been prepared using time-honoured methods of data collection, such as fieldwork, but digital onomastics has clearly gained a permanent foothold, as well as evidenced by a substantial body of research in this area. True to the inherently interdisciplinary character of onomastics and in line with the underlying motif of the congress, which underscores the interaction of the study of proper names with other branches of science, researchers explore the interface of onomastics and an extensive array of disciplines, including though not limited to cognitive studies, dialectology, phonetics and phonology, sociolinguistics, anthropology, history, historical linguistics, postcolonial studies, administration and policy studies, and even geology. The toponyms studied are gathered from all over Europe, including Belarus, the Czech Republic, Finland, Germany, Greece, Hungary, Ireland, Italy, Norway, Poland, Portugal, Slovakia, Spain, Sweden, Ukraine, the United Kingdom, but also from countries on other continents, such as China, Egypt, India, Morocco, New Zealand, Russia, or Tanzania. The book is a must not only for onomasticians, but also for researchers in related disciplines, ranging from history via human geography or philosophy of language to social studies. However, professionals active in naming will find it useful as well, since it provides a much-needed supranational perspective and enables cross-cultural comparisons.

The Book Monthly, 1904 *The Book Monthly* James Milne, 1903

Keeping Kids in the Home and out of the System Lisa A. Hill Ph.D. LMFT, 2018-05-01

Studies have consistently concluded that many personality disorders and more serious mental disorders are believed to be the result of dysfunctional family relationships and very often stem from the parent-child relationship This makes sense children initially learn important behaviors from their families of origin For example parents are the first ones to socialize their child so they can teach their children to socialize and to say please and thank you to take turns be patient etc

The primary purpose of this book is to assure that parents have the information they need

to properly raise children who have the skills necessary to be successful adults and not end up in the Criminal Justice System

By the time you end up in the juvenile justice system it may be too late They become labelled an offender or may even be a predator That label gives society the right to lock the youth up during which time they will be traumatized Sometimes well meaning uninformed and frustrated parents perpetuate their children entering the criminal justice system and even of child-serving agencies such as social services When parents are faced with children who are incorrigible at risk or the parent is unable to care for the child due to their own personal problems some parents will welcome the intervention of the criminal justice system for support

After their child has been taken into custody I have had parents tell me you raise my child because I cannot do it

Some parents believe that having access to a probation officer with a badge and powers of arrest

gives them the relief and respite they needed to address their child's destructive behavior My three decades of

experience working with youth and parents in the criminal justice revealed that in most cases

probation and social services intervention do not make youth better Conversely for most youth their experience with

social services and probation departments has resulted in ongoing delinquency and the youth

transitioning into the adult Criminal Justice System However good parenting is the gatekeeper to the criminal justice system

Through the Eyes of Your Ancestors Maureen Alice Taylor, 1999 Discusses genealogy the study of one's family examining how such an interest develops how to get started how to use family stories and keepsakes where to get help and the positive effects of such study
