Narcotics Dangerous Painkiller:

Narcotics George Glass,1999-12-15 Describes narcotics presents their dangers and provides advice on how to get help when a person is addicted **Warning, the Growing Danger of Prescription Drug Diversion** United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Commerce, Manufacturing, and Trade,2012 **Pain Control and Drug Policy** Guy B. Faguet M.D.,2010-04-15 This book offers an indictment of the nation's drug enforcement approach focusing on the short sighted policies that often deny patients suffering from chronic pain the medications they need Pain Control and Drug Policy A Time for Change focuses on America's national crisis in pain management caused by the widening divergence between the enormous contributions of opioids narcotics to pain management in the clinical setting and the mistaken belief that they are dangerous highly addictive drugs After dissecting the strategy and tactics of the War on Drugs from medical historical legal socioeconomic and geopolitical perspectives Guy Faguet MD indicts the 40 year long War on Drugs for having failed to stem the supply of illicit drugs in America despite expenditures of half a trillion dollars despite violating the basic human right to pain relief of tens of millions of American chronic pain sufferers and despite fomenting organized crime government corruption racial injustice and social disruption in both the United States and the producer countries He concludes with a clarion call for the abandonment of the War on Drugs disbanding the Drug Enforcement Administration and encouraging Congress to repeal the Controlled Substances Act As a clinical and research oncologist responsible for the chronic pain management of thousands of cancer patients over the course of his 30 year career Dr Faguet knows that the most effective and safest way to manage most cases of chronic pain is with opioids All modern pain management textbooks advocate titration to effect in cases where opioids help that is gradually increasing the dosage until either the pain is acceptably controlled or the side effects begin to outweigh the pain relief benefits Yet the vast majority of doctors don't practice what the medical textbooks teach and instead prescribe opioids very reluctantly and conservatively As a result only half of all chronic pain sufferers and fewer than half of all cancer patients get adequate pain relief from their doctors Why do physicians radically undertreat pain that is susceptible to opioid analgesics They fear that if they prescribe Schedule II opioids in accordance with the professional standards of pain management set by such medical bodies as the American Pain Society they will be investigated by the DEA stigmatized prosecuted as criminals stripped of their licenses and sent to jail Visit Guy B Faguet MD's website here www.faguet.net Increased Controls Over Hallucinogens and Other Dangerous Drugs United States.
