National Media Policy:

National Media Policy V. S. Gupta, Rajeshwar Dyal, 1996 Papers presented at a seminar organized by Asian Mass Communication Research and Information Center AMIC Communication Technology, Media Policy, and National Development V. S. Gupta, 1999 With reference to India **National Media Policy**, 1996 European Media Policy for the Twenty-First Century Seamus Simpson, Manuel Puppis, Hilde van den Bulck, 2016-01-29 Media policy issues sit at the heart of the structure and functioning of media systems in Europe and beyond This book brings together the work of a range of leading media policy scholars to provide inroads to a better understanding of how effective media policies can be developed to ensure a healthy communication sector that contributes to the wellbeing of individual citizens as well as a more democratic society Faced with a general atmosphere of disillusionment in the European project one of the core questions tackled by the volume s contributors is what scope is there for European media policy that can exist beyond the national level Uniquely the volume s chapters are structured around four key policy themes media convergence the continued role and position of public regulatory intervention in media policy policy issues arising from the development of new electronic communication network environments and lessons for European media policy from cases beyond the EU In its chapters the volume provides enriched understandings of the role and significance of policy actors institutions structures instruments and processes in communication and media policy **The Myth of Media Globalization** Kai Hafez, 2007-03-26 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization This important book considers anew the globalization phenomenon in the media sphere Rather than heralding globalization or warning of its dangers as in many other books Kai Hafez analyses the degree to which media globalization is really taking place Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media All too often the empirical data presented seems rather more anecdotal than representative Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world The inherent danger is that a central paradigm of the social sciences rather than bearing scholarly substance will turn out to be a myth and even a sometimes dangerously ideological tool Based on a theoretical debate of media globalization the work discusses most major fields of media development including foreign reporting satellite TV film internet foreign broadcasting media and migration media policy and media economy As an important new contribution to timely debates *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike Media Clusters Charlie Karlsson, Robert G. Picard, 2011-01-01 This impressive new book uniquely focuses on the phenomenon of media clusters and is designed to inform policymakers scholars and media practitioners about the underlying challenges of media firm agglomerations their potential and their effects Including an array of distinguished contributors this book explores the rationale and purpose of media clusters how they compare with

clusters in other industries and the significant differences in characteristics development processes and drivers among various media clusters worldwide It incorporates perspectives from economic geography and economics public development and industrial policy organizational studies entrepreneurship as well as cultural and media studies to provide a comprehensive view that provides critical insight into these clusters

Media Reforms and Democratization in Emerging Democracies of Sub-Saharan Africa Ufuoma Akpojivi, 2018-04-03 This book examines the media reform processes and re democratization projects of Ghana and Nigeria s emerging democracies It evaluates and critiques these reform processes arguing that because of dependency approaches resulting from the transplanting of policy framework from the West into these emerging democracies the policy goals and objectives of the reforms have not been achieved Consequently the inherent socio cultural economic and political factors coupled with the historical antecedents of these countries have also affected the reform process Drawing from policy documents analyses and interviews Ufuoma Akpojivi argues that the lack of citizens active participation in policy processes has led to neo liberalization and the continued universalization of Western ideologies such as democracy media freedom and independence Akpojivi posits that the recognition of socio cultural political and economic factors inherent to these emerging democracies coupled with the communal participation of citizens will facilitate true media reform processes and development of these countries

Iosifidis, 2011-08-26 Petros Iosifidis addresses an increasingly prominent subject area in the field of media and communications and one that has attracted increased attention in areas such as sociology economics political science and law global media policy and regulation Specifically he considers the wider social political economic and technological changes arising from the globalization of the communications industries and assesses their impact on matters of regulation and policy By focusing on the convergence of the communication and media industries he makes reference to the paradigmatic shift from a system

based on the traditions of public service in broadcast and telecommunications delivery to one that is demarcated by commercialization privatization and competition In doing so Iosifidis tackles a key question in the field to what extent do new media developments require changes in regulatory philosophy and objectives It considers the various possible meanings of the public interest concept in exploring the different regulatory modes and the interplay between the local and the global in policy making

Media Policy and Music Activity Krister Malm,Roger

Wallis,2003-09-02 How do people make music and how does this activity relate to the policies of governments and the music industry What is the relationship between live music and music we hear on the radio or in music videos How has the digital revolution affected music making in industrialised and in developing nations In Media Policy and Music Activity Krister Malm and Roger Wallis look in depth at the relationships between policies governing the output of the music media and music activity in society A practical base in case study material is combined with a broad theoretical framework for understanding the music media **Global Media and National Policies** Terry Flew,Petros Iosifidis,Jeanette Steemers,2016-04-08

Conventional wisdom views globalization as a process that heralds the diminishing role or even death of the state and the rise of transnational media and transnational consumption Global Media and National Policies questions those assumptions and shows not only that the nation state never left but that it is still a force to be reckoned with With contributions that look at global developments and developments in specific parts of the world it demonstrates how nation states have adapted to globalization and how they still retain key policy instruments to achieve many of their policy objectives This book argues that the phenomenon of media globalization has been overstated and that national governments remain key players in shaping the media environment with media corporations responding to the legal and policy frameworks they deal with at a national level
