

Introduction and Bibliography (5 points)

Instructions: Please write a two-page (double spaced, 12 point font) Introduction. Review the Individual Project Rubric and the Project Guidelines slideshow for guidance. For this worksheet, you may use an outline format rather than writing in expository form. The purpose of the Introduction is to motivate the thesis statement. It is important to address the following *in order* to logically motivate the thesis:

- 1. Describe the general topic of interest**
 - a. Do not state the thesis here
 - b. Assume your readership is composed of professionals in Psychology who are not specialists in this area.
- 2. Describe what work has been done in the field**
 - a. Provide a thorough (but not exhaustive) review of the literature that directly relates to the topic. Somewhere between 3 and 10 references is appropriate.
 - b. Remember the goal is to motivate the thesis and not summarize the entire field.
 - c. It is highly likely that someone has conducted research in your area. Do not be satisfied if a hasty web search doesn't yield articles. You will be held accountable for knowing the literature.
 - d. In the event that you are struggling to find articles that address your unique combination of genres (e.g., the effects of eating PlayDough® on Attention), provide a literature review for each area.
 - e. Cite any statement of fact that's not your own original idea.
- 3. Describe what work needs to be done, or what gaps exist in our knowledge**
 - a. Now that you have described the work to date, what work has yet to be done?
 - b. What questions remain?
 - c. How might current theories be challenged?
 - d. What replications might be conducted to further test the strength of a theory?
- 4. Discuss how your study will fill those gaps**
 - a. Briefly discuss how your study will satisfy the needs listed above.
 - b. Do not include detailed references to methodology. Only included a brief reference to your methods if they are the most important part of the study (e.g., following up on a behavioral experiment with an fMRI study).
- 5. State your thesis as a prediction**
 - a. Now that your thesis is properly motivated, you can state the thesis as a single prediction (e.g., "It is predicted that...")
 - b. A good thesis includes references to the independent variables, the dependent variables, the specific cognitive process being measured, and the conditions. See the Project Guidelines for an example.
- 6. On a separate page in this document, please include an APA style bibliography of your source.**
