New Learning Paradigms in Soft Computing Lakhmi C. Jain, Janusz Kacprzyk, 2013-06-05 Learning is a key issue in the analysis and design of all kinds of intelligent systems In recent time many new paradigms of automated machine learning have been proposed in the literature Soft computing that has proved to be an effective and efficient tool in so many areas of science and technology seems to offer new qualities in the realm of machine learning too The purpose of this volume is to present some new learning paradigms that have been triggered or at least strongly influenced by soft computing tools and techniques mainly related to neural networks fuzzy logic rough sets and evolutionary computations **A New Paradigm of**

Knowledge Engineering by Soft Computing Liya Ding, Fuzzy Logic Systems Institute, 2001 Soft computing SC consists of several computing paradigms including neural networks fuzzy set theory approximate reasoning and derivative free optimization methods such as genetic algorithms The integration of those constituent methodologies forms the core of SC In addition the synergy allows SC to incorporate human knowledge effectively deal with imprecision and uncertainty and learn to adapt to unknown or changing environments for better performance Together with other modern technologies SC and its applications exert unprecedented influence on intelligent systems that mimic human intelligence in thinking learning reasoning and many other aspects Knowledge engineering KE which deals with knowledge acquisition representation validation inferencing explanation and maintenance has made significant progress recently owing to the indefatigable efforts of researchers Undoubtedly the hot topics of data mining and knowledge data discovery have injected new life into the classical AI world This book tells readers how KE has been influenced and extended by SC and how SC will be helpful in pushing the frontier of KE further It is intended for researchers and graduate students to use as a reference in the study of knowledge engineering and intelligent systems The reader is expected to have a basic knowledge of fuzzy logic neural networks genetic algorithms and knowledge based systems New Learning Paradigms in Soft Computing

Springer, 2014-01-15 **New Concepts and Applications in Soft Computing** Valentina Emilia Balas, János Fodor, Annamária R. Várkonyi-Kóczy, 2012-07-21 The book provides a sample of research on the innovative theory and applications of soft computing paradigms The idea of Soft Computing was initiated in 1981 when Professor Zadeh published his first paper on soft data analysis and constantly evolved ever since Professor Zadeh defined Soft Computing as the fusion of the fields of fuzzy logic FL neural network theory NN and probabilistic reasoning PR with the latter subsuming belief networks evolutionary computing including DNA computing chaos theory and parts of learning theory into one multidisciplinary system As Zadeh said the essence of soft computing is that unlike the traditional hard computing soft computing is aimed at an accommodation with the pervasive imprecision of the real world Thus the guiding principle of soft computing is to exploit the tolerance for imprecision uncertainty and partial truth to achieve tractability robustness low solution cost and better rapport with reality In the final analysis the role model for soft computing is the human mind We

hope that the reader will share our excitement and find our volume both useful and inspiring
