Bergem, Astrid Roe, 2015-08-03 This book explores teaching and learning in lower secondary classrooms in the three PISA domains science mathematics and reading Based on extensive video documentation from science math and reading classrooms in Norwegian secondary schooling it analyzes how offered and experienced teaching and learning opportunities in these three subject areas support students learning The in depth investigations of video documentation are combined with analysis of the Norwegian PISA results in order to understand how teaching and learning in science mathematics and reading can be improved Recent reviews indicate that instructional practice does make a difference to students learning and is more important than other factors including students socioeconomic background class size classroom climate and teachers experience and formal training This book opens the discussion on a European basis about contemporary challenges in teaching and learning in secondary schooling Norway as a test bed is particularly interesting due to its long tradition with national curricula and its unitary and non streamed structure Furthermore ideas of educational progressivism and students active ways of working such as individualized teaching adapted teaching inquiry based teaching etc have for a long time been actively promoted within Norwegian educational policies The book draws on analyses that combine expertise in psychometrics and video based micro genetic classroom studies with expertise in domain specific instruction math science and reading It feeds the conversation how issues of communication patterns are dealt with and made productive within different instructional formats and presents possibilities to compare and analyze instructional formats and discursive practices for students learning **Education for Sustainable Development in Primary and Secondary Schools** Güliz Karaarslan-Semiz, 2022-10-19 This volume provides teachers with pedagogical approaches and practical applications to implement Education for Sustainable Development ESD and with assessment strategies to evaluate the learning outcomes of ESD in primary and secondary education In addition to appropriate pedagogical approaches for ESD the book also presents practical examples that teachers can use as a guide in their classes The pedagogical approaches related to ESD not only aim to facilitate sustainability knowledge but also promote attitudes new perspectives values skills and competencies related to sustainability Thus holistic and transformative approaches are embraced to develop a deeper understanding of sustainability values respect towards the environment connection to nature systems thinking to understand complex problems exhibiting responsible behaviours for sustainability and promoting action competence for sustainable development This book also provides examples of assessment strategies for ESD The assessment of ESD learning outcomes and learning processes is usually challenging but it is important to determine how to evaluate ESD learning outcomes to reveal whether we achieve
