New Design Philosophy:

Defuturing Tony Fry, 2020-08-20 Once one understands the nature and magnitude of defuturing as the negation of world futures how one has to account for the history and making of the material world including design dramatically changes Defuturing as our condition forces the generation of a new philosophy of design With these thoughts this book presents a radically new understanding of the history context and futures of designing First published in 1999 now reissued with a new preface by the author Defuturing A New Design Philosophy is a prescient and powerful account of what it means to comprehend that we live in world that is taking away futures for ourselves and non human others Arguing that designing is doubly implicated in this process first in its roles in helping to create the unsustainable but second re thought through the lens of defuturing as a mode of acting in the world that can help contest the negation of the world Defuturing transforms our comprehension of designing and of how futures can be constituted Working not through abstract theorizing but through the analysis of concrete examples the book uses historical material on design to expose the archaeology of defuturing Shattering the illusion that the future simply is Defuturing confronts designing with the challenge of remaking while offering the elements of a new practical reasoning of design acting A New Design Philosophy Tony Fry, 1999 Introduces the idea of defuturing which is first employed here as a deconstructive method to expose foundational flaws in those worlds so familiar to us It places the significance of understanding design before all concerned people while also confronting design students and professionals with a practical retooling exercise Amazon *The New Design Philosophy* Tony Fry, 1999 **Defuturing** Tony Fry, 2020 Preface Introduction An introductory lexicographical review PART I AN OPENING Chapter 1 Technology warring and the crisis of history Technology in flux From structure and from techn From war to warring The crisis of the crisis of history PART II HISTORY MODERNITY AND DEFUTURING Chapter 2 Made in America a world production America Then and now Productivism and a history of world making Chapter 3 Dwelling in streamlined America Streamlining design The New York World s Fair Utopia a designing idea Chapter 4 Total design Europe The Bauhaus as told The Vkhutemas postscript PART III ONE POINT FOUR LOCATIONS Chapter 5 Design and the body of competition The body Bodies of the body The measure that measures the standards Openings as endings Chapter 6 Time and China Time The years of 1926 China four perspectives Chapter 7 Televisual in human design The televisual Perspectives and horizons Ecology of the image Chapter 8 The autonomic technocentricity of computers The reason machine The force of design Reiterations towards making decisions Concluding impressions Select bibliography Index **Design Ethics beyond Duty and Virtue** Philippe d'Anjou, 2017-06-20 Freedom is compelling in design it has to be acknowledged accepted and comprehended in all its existential complexity to better understand and engage the intricate ethical domain of design practice The book addresses that issue by thoroughly examining design ethics and design in general within an existentialist philosophical framework Its inquiry reveals a puzzling and unsettling reality of design ethics and hence what constitutes an ethical design practice where

there is no exit for designers but complete acceptance of their freedom and responsibility This book makes a unique original and invaluable contribution to the design literature and design ethics scholarship Scholars professors students and professionals in all design disciplines as well as any person involved in arts humanities philosophy social sciences and engineering will find philosophical insights that will challenge design thinking and inspire them to rethink design ethics as an agency of human existence making instead of code compliance Making a case for existentialist design ethics this book lays the ground for a radical transformation of how we conceive design ethics in design practice and the role of designers in the world
