New Eco Architecture Alternatives From The Modern Movement:

The New Eco-Architecture: Alternatives from the Modern Movement Colin Porteous, 2013-10-11 The New Eco Architecture builds a historical bridge between architectural science and design It seeks to address neglected aspects of the Modern Movement as a prelude to supporting a diversity of architectural insight and experimentation aimed at twenty first century environmental needs and priorities The attitudes and influences of renowned figures are re examined in relation to current issues of architectural sustainability By setting today s green architectural quest within a twentieth century context and evaluating the main protagonists with regard to a modern eco sensitive lineage the book will be of primary interest to architectural students academics and practitioners However it should also intrigue historians theoreticians and critics who tend to gloss over such issues as well as other disciplines engaged with the built environment **The New**

Eco-architecture Colin Porteous, Crichton Porteous, 2009 From Bauhaus to Ecohouse Peder Anker, 2010 Debates about environmentally sensitive architecture have been ongoing for nearly a century From Bauhaus to Eco House examines key moments of inspiration and exchange between designers and ecologists from the Bauhaus projects of the interwar period to the eco arks of the late 1980s From Bauhaus to Eco House provides new insight into a critical period in the evolution of environmental awareness and design Energy Accounts Dan Willis, William Braham, Katsuhiko Muramoto, Daniel Barber, 2016-06-23 How does one tell the story of energy production use or conservation in a manner sufficiently convincing to influence policy behavior and design Energy Accounts explores potential answers to this question through compelling images data visualizations narratives and other examples of accounting for energy Organized into a collection containing both examples of best practices and critiques this impressive array of projects and contributors combines text and graphic material to explore different representations of energy data Including work from Kieran Timberlake SHoP AMO Lateral Office WOHA and many more the book boasts a unique graphic design which supports and enhances its role as a valuable resource for professionals and students in architecture engineering and urban design Chemistry, Emission Control, Radioactive Pollution and Indoor Air Quality Nicolas Mazzeo, 2011-07-27 The atmosphere may be our most precious resource Accordingly the balance between its use and protection is a high priority for our civilization While many of us would consider air pollution to be an issue that the modern world has resolved to a greater extent it still appears to have considerable influence on the global environment In many countries with ambitious economic growth targets the acceptable levels of air pollution have been transgressed Serious respiratory disease related problems have been identified with both indoor and outdoor pollution throughout the world The 25 chapters of this book deal with several air pollution issues grouped into the following sections a air pollution chemistry b air pollutant emission control c radioactive pollution and d indoor air quality

Lessons from Modernism Kevin Bone, 2014-05-13 This valuable reference for today s green building movement examines twentieth century modern architecture including buildings by Le Corbusier and Oscar Niemeyer through the lens of

sustainability The hottest topics in contemporary architectural design and architectural history the focus on sustainability and the evaluation of the modern movement meet in *Lessons from Modernism* a partnership with The Cooper Union that explores the ways in which the straightforward functional approach of modernist design creates environmentally sensitive solutions *Lessons from Modernism* provides new insights into 25 buildings by a diverse selection of architects including Frank Lloyd Wright Paul Rudolph Jean Prouv and Arne Jacobsen and demonstrates how these architects integrated environmental concerns into their designs Buildings are located across the United States Central and South America Cuba Japan and more and include houses art centers commercial buildings and civic buildings *Lessons from Modernism* is an affordable reference work for all interested in how architecture intersects with the green movement pairing full descriptions of all buildings with analytical essays featuring charts of climate zones and solar movement and concluding with a comprehensive chronology that details how environmental consciousness evolved throughout the twentieth century

Solar Architecture in Cool Climates Colin Porteous, 2012-04-27 A must read for practitioners teachers and others interested in or working with energy use in the built environment including a delightful set of examples Ann Grete Hestnes former President of the International Solar Energy Society *Solar Architecture in Cool Climates* is an invaluable primer on low energy building design combining accessible information with convincing arguments enabling new techniques to be implemented in daily practice Approaching the topic in a thematic manner the book provides inspiration an understanding of key principles and technical data on the design of solar buildings in higher latitudes The text is enlivened through direct experience of case studies from Europe and North America dealing with new build retrofitting and conceptual projects that outline future potential the principles being equally applicable to equivalent southern latitude locations The authors examine the dilution of additional costs through different strategies the tensions between energy efficiency and environmental quality and the proactive control of energy in building design Promoting flexibility and opportunity to a diverse audience including those who use procure and finance buildings the book aims to bring the design of green solar buildings in cool climates from special interest status into the mainstream Broader environmental issues relating to solar architecture are addressed in the final chapter again drawing on case studies from the authors own wide experience *Solar Architecture in Cool Climates* is written for architects and other building designers students of architecture and other professionals interested in sustainable architecture renewable energy and engineering

Housing Fit For Purpose Fionn Stevenson, 2019-10-22 *Housing Fit for Purpose* sets out a research focused approach to

looking at the challenges facing the built environment in approaching the design construction and management of housing. This book uses original research by the author on housing performance evaluation and distils it for built environment professionals arguing that learning from feedback should be taking place at every stage of the housing project lifecycle improving outcomes for end users. Drawing on active research this book shows why and how the design construction and management of housing can be linked to feedback and actual evidence of how people choose and learn to use their homes. It examines the key concepts which underlie participatory design, occupancy feedback and learning and includes a practical primer on how to undertake housing occupancy feedback. *Precedented Environmental Futures* Colin Porteous, 2019-04-17

This book addresses the built environment through the lens of environmental architecture and in a holistic manner. It moves gradually from psychophysiology and thinking/doing/feeling modalities through environmental criteria to environmental modulation concluding with a debate around mitigation and adaptation. Much use is made of re-interpreting past quotations seen as relevant for environmental architecture. No definitive conclusions are reached but rather broad discursive messages are offered. The text will have lasting luminance for new generations involved with the built environment.
