New Electronic Media Innovations In Video Technologies:

The New Electronic Media Hoyt Hilsman, 1989 Hilsman's *The New Electronic Media* offers a comprehensive overview of the startling advances in the telecommunications industry within the last decade. He places current trends within their historical context and predicts future trends that will have a considerable impact on the life of the individual consumer.

Electronic Media Management Peter K. Pringle, Michael F. Starr, William E. McCavitt, 1995 This new edition reflects the changing practices and priorities including new regulations and guidelines, updates of broadcast programming and a vision of what is to come in electronics media management in the future. *Electronic Media* Norman J. Medoff, Barbara Kaye, 2013-03-20 *Electronic Media* connects the traditional world of broadcasting with the contemporary universe of digital electronic media. It provides a synopsis of the beginnings of electronic media in broadcasting and the subsequent advancements into digital media. Underlying the structure of the book is a See It Then See It Now See It Later approach that focuses on how past innovations lay the groundwork for changing trends in technology, providing the opportunity and demand for change in both broadcasting and digital media. FYI and Zoom In boxes point to further information, tying together the immediate and long-ranging issues surrounding electronic media. Career Tracks feature the experiences of industry experts and share tips in how to approach this challenging industry. Check out the companion website at <http://www.routledge.com/cw/medoff/9780240812564> for materials for both students and instructors. The New Media Tapio Varis, 1992

Television Production Ron Whittaker, 1993 **A Social History of Contemporary Democratic Media** Jesse Drew, 2013-05-02 The last few decades have helped dispel the myth that media should remain driven by high-end professionals and market share. This book puts forward the concept of communications from below in contrast to the globalization from above that characterizes many new developments in international organization and media practices. By examining the social and technological roots that influence current media evolution, Drew allows readers to understand not only the Youtubes and Facebooks of today but to anticipate the trajectory of the technologies to come. Beginning with a look at the inherent weaknesses of the U.S. broadcasting model of mass media, Drew outlines the early 1960s and 1970s experiments in grassroots media where artists and activists began to re-engineer electronic technologies to target local communities and underserved audiences. From these local projects emerged national and international communications projects creating production models, social networks, and citizen expectations that would challenge traditional means of electronic media and cultural production. Drew's perspective puts the social and cultural use of the user at the center, not the particular media form. Thus the structure of the book focuses on the local, the national, and the global desire for communications regardless of the means. **Digital Media and Innovation** Richard A. Gershon, 2024-03-26 This fully updated second edition explores the importance of innovation and innovative thinking for the long-term success of today's leading media, telecommunications, and information technology companies. The book takes an in-depth look at how smart

creative companies have transformed today's digital economy by introducing unique and highly differentiated products and services. This edition provides a detailed overview of intelligent networks and analyzes disruptive business models and processes from companies involved in social media, artificial intelligence, the metaverse, smart cities, and robotics among other emerging areas. From Apple to Zoom, this book considers some of the key people, companies, and strategies that have transformed the communication industries. Exploring the power of good ideas, this book goes inside the creative edge and looks at what makes such companies successful over time. *Digital Media and Innovation* is suited to advanced undergraduate and graduate courses in media management, media industries, communication technology, and business management and innovation, and provides up-to-date research for media and business professionals.

Information Visualization in The Era of Innovative Journalism Carlos Toural-Bran, Ángel Vizoso, Sara Pérez-Seijo, Marta Rodríguez-Castro, María-Cruz Negreira-Rey, 2020-04-21 *Information Visualization in the Era of Innovative Journalism* brings together over 30 authors from countries around the world to synthesize how recent technological innovations have impacted the development, practice, and consumption of contemporary journalism. As technology rapidly progresses, shifts, and innovates, there have been immense changes in the way we communicate. This book collects research from around the world that takes an in-depth look at the primary transformations related to journalistic innovation in recent times. High-profile contributors provide cutting-edge scholarship on innovation in journalism as it relates to emergent topics such as virtual reality, podcasting, multimedia, infographics, social media, mobile storytelling, and others. The book pays special attention to the development of information visualization and the ability of recent innovations to meet audience needs and desires. Students and scholars studying contemporary journalism history and practice will find this a vital and up-to-date resource, as well as those studying communication technology as it relates to marketing, PR, or mass media broadly.
