Global Perspectives in the Geography Curriculum Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians

Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself

New Basics Tony Bushell, 2004 Well chosen photocopiable materials save time in lesson preparation Less able pupils can spend more time on the real geographical element of the lesson Students can compile a folder of work with the worksheets enabling them to monitor their own progress Encouraging and spacious layout increases confidence of less able learners Pupil friendly design encourages concentration and the attainment of measurable outcomes
