The Cultural Patronage of Medieval Women June Hall McCash, 1996 The Cultural Patronage of Medieval Women is the first volume exclusively devoted to an examination of the significant role played by women as patrons in the evolution of medieval culture The twelve essays in this volume look at women not simply as patrons of letters but also as patrons of the visual and decorative arts of architecture and of religious and educational foundations Patronage as a means of empowerment for women is an issue that underlies many of the essays Among the other topics discussed are the various forms patronage took the obstacles to women's patronage and the purposes behind patronage Some women sought to further political and dynastic agendas others were more concerned with religion and education still others sought to provide positive role models for women The amusement of their courts was also a consideration for female patrons These essays also demonstrate that as patrons women were often innovators They encouraged vernacular literature as well as the translation of historical works and of the Bible frequently with commentary into the vernacular They led the way in sponsoring a variety of genres and encouraged some of the best known and most influential writers of the Middle Ages Moreover they were at the forefront in fostering the new art of printing which made books accessible to a larger number of people Finally the essays make clear that behind much patronage lay a concern for the betterment of women

History as a Visual Art in the Twelfth-Century Renaissance Karl F. Morrison, 2014-07-14 Karl Morrison discusses historical writing at a turning point in European culture the so-called Renaissance of the twelfth century Why do texts considered at that time to be masterpieces seem now to be fragmentary and full of contradictions Morrison maintains that the answer comes from ideas about art Viewing histories as artifacts made according to the same aesthetic principles as paintings and theater he shows that twelfth-century authors and audiences found unity not in what the reason read in a text but in what the imagination read into it they prized visual over verbal imagination and employed a circular or

nuclear spectator centered perspective cast aside in the Renaissance of the fourteenth and fifteenth centuries Twelfth century writers assimilated and transformed a tradition of the conceptual unity of all the arts and attributed that unity to the fact that art both conceals and discloses Recovering that tradition especially the methods and motives of concealment provides extraordinary insights into twelfth century ideas about the kingdom of God the status of women and the nature of time itself It also identifies a strain in European thought that had striking affinities to methods of perception familiar in Oriental religions and that proved to be antithetic to later humanist traditions in the West Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Oxford History of Western Art Martin Kemp, 2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readers are given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union

India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students

Monuments of Medieval Art Robert G. Calkins, 1985 This richly illustrated and scholarly study traces the development of art through the Middle Ages

from the early Christian catacombs of Italy and the treasures of Sutton Hoo to the masterpieces of Romanesque cathedrals and illuminated manuscripts **Medieval Art** Veronica Sekules, 2001-04-26 This refreshing new look at Medieval art conveys a very real sense of the impact of art on everyday life in Europe from 1000 to 1500 It examines the importance of art in the expression and spread of knowledge and ideas including notions of the heroism and justice of war and the dominant view of Christianity Taking its starting point from issues of contemporary relevance such as the environment the identity of the artist and the position of women the book also highlights the attitudes and events specific to the sophisticated visual culture of the Middle Ages and goes on to link this period to the Renaissance The fascinating question of whether commercial and social activities between countries encouraged similar artistic taste and patronage or contributed to the defining of cultural difference in Europe is fully explored **Art Research Methods and Resources** Lois Swan Jones, 1984
