Landscape Changes in Africa Jörgen Runge, 2013-11-15 Volume 32 2013 of the internationally recognized and acclaimed yearbook series Palaeoecology of Africa publishes 9 new interdisciplinary scientific papers on former and recent landscape evolution and on past environments of the African continent e.g. climate change, vegetation dynamics and growing impact of humans on ecosystems. These papers **Palaeoecology of Africa**, 2016 The African Neogene Jürgen Runge, 2018

During the Neogene covering the last 23 Million years the evolution of the environmental setting in Africa was subject to considerable changes. Natural shifts, slow and rapid, evidenced by modifications in palaeogeography, geodynamics, climate and vegetation, have caused repeated and strong changes of ecosystems in the lower latitudes. Using a variety of proxy data researched and applied by many authors from numerous disciplines, an attempt is made to reconstruct African landscapes over space and time. Besides such spatio-temporal oscillations in recently humid, semi-humid and dry areas of Africa, this volume of Palaeoecology of Africa (PoA) focuses on long-term interrelationships between ecosystem dynamics and climate change, not ignoring the ever-growing and ongoing influence of humans on natural ecosystems since the Quaternary. Regionally, this volume lays a strong focus on Nigeria, Niger Delta. Facing the omnipresent challenges of Global Change, an increasing number of African scientists is involved in palaeoenvironmental and palaeoclimatic research, both theoretical and applied. PoA systematically supports established as well as junior African scientists in the field of sustainable cooperation and academic capacity building. This book will be of interest to all concerned with or interested in up-to-date research on Neogene to Quaternary low latitudes ecosystem changes and their respective interpretation in the framework of natural climate and vegetation change, evidenced by a variety of methods that allow to read and learn from the past by following the motto: The geologic foretime as the key to the present and possibly to the future. Palynologists, Geologists, Geographers, Archaeologists and Geomorphologists will find this edition equally useful for their work.
