Context Charles Wolf, *The Economic Pivot in a Political Context* by Charles Wolf Jr explains how iron curtains have been replaced by porous ones in the post cold war era New countries multilateral organizations regional and subregional groups multinational corporations international business alliances and financial networks have made the global arena ever more complex As seen in the cases of Haiti Iraq and Chechnya rapid change and a less predictable atmosphere generate an ever present threat of volatility Openness to global continuous flows of information trade capital technology and people continues to blur our borders Simultaneously a postmodern preoccupation with domestic social political and economic affairs is taking shape **Economic Globalisation as Religious War** Michael McKinley, 2007-06-28 Using a critical theory approach to analyze the globalization of the world economy this provocative and topical new book presents economic globalization not as a recent development but rather as a familiar process that has occurred throughout history Michael McKinley argues that it is ultimately a self serving arbitrary and destructive imperial project that should be viewed as a religious war

Moments in Modern Economics David F. Ruccio,Jack Amariglio,2016-06-28 Of all the areas of contemporary thought economics seems the most resistant to the destabilizing effects of postmodernism Yet David Ruccio and Jack Amariglio argue that one can detect within the diverse schools of thought that comprise the discipline of economics moments that defy the modernist ideas to which many economists and methodologists remain wedded This is the first book to document the existence and to explore the implications of the postmodern moments in modern economics Ruccio and Amariglio begin with a powerful argument for the general relevance of postmodernism to contemporary economic thought They then conduct a series of case studies in six key areas of economics From the idea of the multiple self and notions of uncertainty and information through market anomalies and competing concepts of value to analytical distinctions based on gender and academic standing economics is revealed as defying the modernist frame of a singular science The authors conclude by showing how economic theory would change if the postmodern elements were allowed to flourish A work of daring analysis sure to be vigorously debated *Postmodern Moments in Modern Economics* is both accessible and relevant to all readers concerned about the modernist straightjacket that has been imposed on the way economics is thought about and practiced in the world today **Why Globalization Works** Martin Wolf,2005-06-10 A powerful case for the global market economy The

debate on globalization has reached a level of intensity that inhibits comprehension and obscures the issues In this book a highly distinguished international economist scrupulously explains how globalization works as a concept and how it operates in reality Martin Wolf confronts the charges against globalization delivers a devastating critique of each and offers a realistic scenario for economic internationalism in the future Wolf begins by outlining the history of the global economy in the twentieth century and explaining the mechanics of world trade He dissects the agenda of globalization s critics and rebuts the arguments that it undermines sovereignty weakens democracy intensifies inequality privileges the multinational corporation and devastates the environment The author persuasively defends the principles of international economic

integration arguing that the biggest obstacle to global economic progress has been the failure not of the market but of politics and government in rich countries as well as poor. He examines the threat that terrorism poses and maps the way to a global market economy that can work for everyone.

Handbook of Alternative Theories of Economic Development
 Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28
 The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.
