Population Change In North Western Europe 1750 185:

Scotland's Populations from the 1850s to Today Michael Anderson, 2018-03-01 *Scotland's Populations* is a coherent and comprehensive description and analysis of the most recent 170 years of Scottish population history. With its coverage of both national and local themes set in the context of changes in Scottish economy and society, this study is an essential and definitive source for anyone teaching or writing on modern Scottish history, sociology or geography. Michael Anderson explores subjects such as population growth and decline, rural settlement and depopulation, and migration and emigration. It sets current and recent population changes in their long term context, exploring how the legacies of past demographic change have combined with a history of weak industrial investment, employment insecurity, deprivation and poor living conditions to produce the population profiles and changes of Scotland today. While focussing on Scottish data, Anderson engages in a rigorous treatment of comparisons of Scotland with its neighbours in the British Isles and elsewhere in Europe, which ensures that this is more than a one country study.

Victorian Women, Unwed Mothers and the London Foundling Hospital Jessica A. Sheetz-Nguyen, 2012-05-10 This volume seeks to address the questions of poverty, charity and public welfare, taking the nineteenth century London Foundling Hospital as its focus. It delineates the social rules that constructed the gendered world of the Victorian age and uses respectability as a factor for analysis. The women who successfully petitioned the Foundling Hospital for admission of their infants were not East End prostitutes but rather unmarried women, often domestic servants, determined to maintain social respectability. The administrators of the Foundling Hospital reviewed over two hundred petitions annually, deliberated on about one hundred cases and accepted not more than 25 per cent of all cases. Using primary material from the Foundling Hospital's extensive archives, this study moves methodically from the broad social and geographical context of London and the Foundling Hospital itself to the micro historical case data of individual mothers and infants.

The World the Plague Made James Belich, 2024-06-25 A groundbreaking history of how the Black Death unleashed revolutionary change across the medieval world and ushered in the modern age. In 1346 a catastrophic plague beset Europe and its neighbours. The Black Death was a human tragedy that abruptly halved entire populations and caused untold suffering, but it also brought about a cultural and economic renewal on a scale never before witnessed. *The World the Plague Made* is a panoramic history of how the bubonic plague revolutionized labour, trade and technology and set the stage for Europe's global expansion. James Belich takes readers across centuries and continents to shed new light on one of history's greatest paradoxes: Why did Europe's dramatic rise begin in the wake of the Black Death? Belich shows how plague doubled the per capita endowment of everything, even as it decimated the population. Many more people had disposable incomes. Demand grew for silks, sugar, spices, furs, gold and slaves. Europe expanded to satisfy that demand, and plague provided the means. Labour scarcity drove more use of waterpower, wind power and gunpowder. Technologies like water-powered blast furnaces, heavily gunned galleons and musketry were fast tracked by

plague A new crew culture of disposable males emerged to man the guns and galleons Setting the rise of Western Europe in global context Belich demonstrates how the mighty empires of the Middle East and Russia also flourished after the plague and how European expansion was deeply entangled with the Chinese and other peoples throughout the world **The Oxford Handbook of Early Modern European History, 1350-1750** Hamish Scott, 2015-07-23 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350 1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power

Rulers, Religion, and Riches Jared Rubin, 2017-02-16 For centuries following the spread of Islam the Middle East was far ahead of Europe Yet the modern economy was born in Europe Why was it not born in the Middle East In this book Jared Rubin examines the role that Islam played in this reversal of fortunes It argues that the religion itself is not to blame the importance of religious legitimacy in Middle Eastern politics was the primary culprit Muslim religious authorities were given an important seat at the political bargaining table which they used to block important advancements such as the printing press and lending at interest In Europe however the Church played a weaker role in legitimizing rule especially where Protestantism spread indeed the Reformation was successful due to the spread of printing which was blocked in the Middle East It was precisely in those Protestant nations especially England and the Dutch Republic where the modern economy was born
