Rigid Analytic Geometry And Its Applications:

Rigid Analytic Geometry and Its Applications Jean Fresnel, Marius van der Put, 2012-12-06 Rigid analytic spaces were invented to describe degenerations reductions and moduli of algebraic curves and abelian varieties This work a revised and greatly expanded new English edition of an earlier French text by the same authors presents important new developments and applications of the theory of rigid analytic spaces to abelian varieties points of rigid spaces tale cohomology Drinfeld modular curves and Monsky Washnitzer cohomology The exposition is concise self contained rich in examples and exercises and will serve as an excellent graduate level text for the classroom or for self study *Valuation Theory and Its Applications* Franz-Viktor Kuhlmann, Salma Kuhlmann, Murray Marshall, 2002-01-01 This book is the first of two proceedings volumes stemming from the International Conference and Workshop on Valuation Theory held at the University of Saskatchewan Saskatoon SK Canada Valuation theory arose in the early part of the twentieth century in connection with number theory and has many important applications to geometry and analysis the classical application to the study of algebraic curves and to Dedekind and Prufer domains the close connection to the famous resolution of the singularities problem the study of the absolute Galois group of a field the connection between ordering valuations and quadratic forms over a formally real field the application to real algebraic geometry the study of noncommutative rings etc The special feature of this book is its focus on current applications of valuation theory to this broad range of topics Also included is a paper on the history of valuation theory The book is suitable for graduate students and research mathematicians working in algebra algebraic geometry number theory and mathematical logic **Berkovich Spaces and Applications** Antoine Ducros, Charles Favre, Johannes Nicaise, 2014-11-21 We present an introduction to Berkovich s theory of non archimedean analytic spaces that emphasizes its applications in various fields The first part contains surveys of a foundational nature including an introduction to Berkovich analytic spaces by M Temkin and to tale cohomology by A Ducros as well as a short note by C Favre on the topology of some Berkovich spaces The second part focuses on applications to geometry A second text by A Ducros contains a new proof of the fact that the higher direct images of a coherent sheaf under a proper map are coherent and B R my A Thuillier and A Werner provide an overview of their work on the compactification of Bruhat Tits buildings using Berkovich analytic geometry The third and final part explores the relationship between non archimedean geometry and dynamics A contribution by M Jonsson contains a thorough discussion of non archimedean dynamical systems in dimension 1 and 2 Finally a survey by J P Otal gives an account of Morgan Shalen s theory of compactification of character varieties This book will provide the reader with enough material on the basic concepts and constructions related to Berkovich spaces to move on to more advanced research articles on the subject We also hope that the applications presented here will inspire the reader to discover new settings where these beautiful and intricate objects might arise **p -adic Geometry** Matthew Baker, 2008 In recent decades p adic geometry and p adic cohomology theories have become indispensable tools in number theory algebraic geometry and

the theory of automorphic representations The Arizona Winter School 2007 on which the current book is based was a unique opportunity to introduce graduate students to this subject Following invaluable introductions by John Tate and Vladimir Berkovich two pioneers of non archimedean geometry Brian Conrad's chapter introduces the general theory of Tate's rigid analytic spaces Raynaud's view of them as the generic fibers of formal schemes and Berkovich spaces Samit Dasgupta and Jeremy Teitelbaum discuss the p -adic upper half plane as an example of a rigid analytic space and give applications to number theory modular forms and the p -adic Langlands program Matthew Baker offers a detailed discussion of the Berkovich projective line and p -adic potential theory on that and more general Berkovich curves Finally Kiran Kedlaya discusses theoretical and computational aspects of p -adic cohomology and the zeta functions of varieties This book will be a welcome addition to the library of any graduate student and researcher who is interested in learning about the techniques of p -adic geometry

BOOK JACKET *Snowbird Lectures in Algebraic Geometry* Ravi Vakil, 2005 A significant part of the 2004 Summer Research Conference on Algebraic Geometry Snowbird UT was devoted to lectures introducing the participants in particular graduate students and recent Ph.D.s to a wide swathe of algebraic geometry and giving them a working familiarity with exciting rapidly developing parts of the field One of the main goals of the organizers was to allow the participants to broaden their horizons beyond the narrow area in which they are working A fine selection of topics and a noteworthy list of contributors made the resulting collection of articles a useful resource for everyone interested in getting acquainted with the modern topic of algebraic geometry The book consists of ten articles covering among others the following topics the minimal model program derived categories of sheaves on algebraic varieties Kobayashi hyperbolicity groupoids and quotients in algebraic geometry rigid analytic varieties and equivariant cohomology Suitable for independent study this unique volume is intended for graduate students and researchers interested in algebraic geometry

D-Modules, Perverse Sheaves, and Representation Theory Kiyoshi Takeuchi, Ryoshi Hotta, Toshiyuki Tanisaki, 2007-10-12 D-modules continues to be an active area of stimulating research in such mathematical areas as algebraic analysis differential equations and representation theory Key to D-modules Perverse Sheaves and Representation Theory is the author's essential algebraic analytic approach to the theory which connects D-modules to representation theory and other areas of mathematics To further aid the reader and to make the work as self-contained as possible appendices are provided as background for the theory of derived categories and algebraic varieties The book is intended to serve graduate students in a classroom setting and as self-study for researchers in algebraic geometry representation theory

Representation Theory and Automorphic Forms Toshiyuki Kobayashi, Wilfried Schmid, Jae-Hyun Yang, 2007-10-10 This volume uses a unified approach to representation theory and automorphic forms It collects papers written by leading mathematicians that track recent progress in the expanding fields of representation theory and automorphic forms and their association with number theory and differential geometry Topics include Automorphic forms and distributions modular forms visible actions Dirac cohomology holomorphic forms harmonic

analysis self dual representations and Langlands Functoriality Conjecture Both graduate students and researchers will find inspiration in this volume

Perfectoid Spaces Debargha Banerjee, Kiran S. Kedlaya, Ehud de Shalit, Chitrabhanu Chaudhuri, 2022-04-21 This book contains selected chapters on perfectoid spaces their introduction and applications as invented by Peter Scholze in his Fields Medal winning work These contributions are presented at the conference on Perfectoid Spaces held at the International Centre for Theoretical Sciences Bengaluru India from 9-20 September 2019 The objective of the book is to give an advanced introduction to Scholze's theory and understand the relation between perfectoid spaces and some aspects of arithmetic of modular or more generally automorphic forms such as representations mod p lifting of modular forms completed cohomology local Langlands program and special values of L functions All chapters are contributed by experts in the area of arithmetic geometry that will facilitate future research in the direction

Perfectoid Spaces Bhargav Bhatt, Ana Caraiani, Kiran S. Kedlaya, Peter Scholze, Jared Weinstein, 2022-02-04 Introduced by Peter Scholze in 2011 perfectoid spaces are a bridge between geometry in characteristic 0 and characteristic p and have been used to solve many important problems including cases of the weight monodromy conjecture and the association of Galois representations to torsion classes in cohomology In recognition of the transformative impact perfectoid spaces have had on the field of arithmetic geometry Scholze was awarded a Fields Medal in 2018 This book originating from a series of lectures given at the 2017 Arizona Winter School on perfectoid spaces provides a broad introduction to the subject After an introduction with insight into the history and future of the subject by Peter Scholze Jared Weinstein gives a user friendly and utilitarian account of the theory of adic spaces Kiran Kedlaya further develops the foundational material studies vector bundles on Fargues-Fontaine curves and introduces diamonds and sheaves over them with a view toward the local Langlands correspondence Bhargav Bhatt explains the application of perfectoid spaces to comparison isomorphisms in p -adic Hodge theory Finally Ana Caraiani explains the application of perfectoid spaces to the construction of Galois representations associated to torsion classes in the cohomology of locally symmetric spaces for the general linear group This book will be an invaluable asset for any graduate student or researcher interested in the theory of perfectoid spaces and their applications

Algebraic and Combinatorial Aspects of Tropical Geometry Erwan Brugalle, Maria Angelica Cueto, Alicia Dickenstein, Eva-Maria Feichtner, Ilia Itenberg, 2013-05-23 This volume contains the proceedings of the CIEM workshop on Tropical Geometry held December 12-16 2011 at the International Centre for Mathematical Meetings CIEM Castro Urdiales Spain Tropical geometry is a new and rapidly developing field of mat
