Rings With Minimum Condition:

Rings with Minimum Condition Emil Artin, Cecil James Nesbitt, Robert McDowell Thrall, 1952 **Structure of Rings**
Nathan Jacobson, 1964 The main purpose of this volume is to give an account of the important developments in the theory of non commutative rings These are the structure theory of rings without finiteness assumptions cohomology of algebras and structure and representation theory of non semi simple rings Frobenius algebras quasi Frobenius rings Rings with Minimum Condition Emil Artin, 1955 Rings with Minimum Condition Emil Artin, Cecil James Nesbitt, Robert M. Thrall, 1961

Rings and Homology James P. Jans, 2015-01-05 This concise text is geared toward students of mathematics who have completed a basic college course in algebra Combining material on ring structure and homological algebra the treatment offers advanced undergraduate and graduate students practice in the techniques of both areas After a brief review of basic concepts the text proceeds to an examination of ring structure with particular attention to the structure of semisimple rings with minimum condition Subsequent chapters develop certain elementary homological theories introducing the functor Ext and exploring the various projective dimensions global dimension and duality theory Each chapter concludes with a set of exercises **Semidistributive Modules and Rings** A.A. Tuganbaev, 2012-12-06 A module M is called distributive if the lattice $\text{Lat } M$ of all its submodules is distributive i.e. $F \cap (G + H) = (F \cap G) + (F \cap H)$ for all submodules F, G and H of the module M A module M is called uniserial if all its submodules are comparable with respect to inclusion i.e. the lattice $\text{Lat } M$ is a chain Any direct sum of distributive resp uniserial modules is called a semidistributive resp serial module The class of distributive resp semidistributive modules properly contains the class of all uniserial resp serial modules In particular all simple resp semisimple modules are distributive resp semidistributive All strongly regular rings for example all factor rings of direct products of division rings and all commutative regular rings are distributive all valuation rings in division rings and all commutative Dedekind rings e.g. rings of integral algebraic numbers or commutative principal ideal rings are distributive A module is called a Bezout module or a locally cyclic module if every finitely generated submodule is cyclic If all maximal right ideals of a ring A are ideals e.g. if A is commutative then all Bezout A modules are distributive **Topological Rings**

Satisfying Compactness Conditions M. Ursul, 2012-12-06 Introduction In the last few years a few monographs dedicated to the theory of topological rings have appeared Warn27 Warn26 Wies 19 Wies 20 ArnGM Ring theory can be viewed as a particular case of Z algebras Many general results true for rings can be extended to algebras over commutative rings In topological algebra the structure theory for two classes of topological algebras is well developed Banach algebras and locally compact rings The theory of Banach algebras uses results of Banach spaces and the theory of locally compact rings uses the theory of LCA groups As far as the author knows the first papers on the theory of locally compact rings were Pontr1 J1 J2 JT An lOt K1 K2 K3 K4 K5 K6 Later two papers GS1 GS2 appeared which contain many results concerning locally compact rings This book can be used in two ways It contains all necessary elementary results from the theory of topological groups and

rings In order to read these parts of the book the reader needs to know only elementary facts from the theories of groups rings modules topology The book consists of two parts *Representation Theory of Finite Groups and Associative Algebras* Charles W. Curtis, Irving Reiner, 2006 Provides an introduction to various aspects of the representation theory of finite groups This book covers such topics as general non commutative algebras Frobenius algebras representations over non algebraically closed fields and fields of non zero characteristic and integral representations *Injective Modules and Injective Quotient Rings* Carl Faith, 2019-08-21 First published in 1982 These lectures are in two parts Part I entitled injective Modules Over Levitzki Rings studies an injective module E and chain conditions on the set $A(E, R)$ of right ideals annihilated by subsets of E Part II is on the subject of FPF or finitely pseudo Frobenius rings i.e all finitely generated faithful modules generate the category $\text{mod } R$ of all R modules The FPF rings had been introduced by Azumaya as a generalization of quasi Frobenius rings but FPF includes infinite products of Prufer domains e.g $\mathbb{Z}_w$ *Cyclic Modules and the Structure of Rings* S.K. Jain, Ashish K. Srivastava, Askar A. Tuganbaev, 2012-09-27 This unique monograph brings together important material in the field of noncommutative rings and modules It provides an up to date account of the topic of cyclic modules and the structure of rings which will be of particular interest to those working in abstract algebra and to graduate students who are exploring potential research topics
