The Great Rip-Off in American Education Mel Scarlett, 2012-04-30 This hard hitting critique will serve as a wake up call to university administrators and faculty as well as to the average parent or prospective college student facing ever increasing tuition costs While reports of poor teaching at the elementary and secondary school level have unleashed widespread public outcry for reform little attention has been paid to the quality of teaching in colleges and universities Yet according to the National Commission on Educating Undergraduates in the Research University universities have too often failed and continue to fail their undergraduate populations and the students paying the tuition get in all too many cases less than their money s worth Citing this report and other similar studies experienced university administrator Dr Mel Scarlett criticizes the deficits of the current undergraduate educational system and suggests improvements that would ensure that college students get the education they re paying for Among his suggestions for reform are Renewed emphasis on teaching skills in Ph D programs to ensure that those who do teach have some pedagogical training besides their special expertise The more active role of experienced professors in the teaching of undergraduates to reverse the current trend of using graduate assistants or part time faculty to teach lower level courses Encouraging students active participation in the learning process as opposed to the passive learning model of the lecture
