Rise And Fall Of Elites An Application Of Theoretical Sociology

Melvyn L. Fein

Rise And Fall Of Elites An Application Of Theoretical Sociology:

The Rise and Fall of the Elites Vilfredo Pareto, 1991-01-01 Combining a thorough introduction to the work of nineteenth and early twentieth century Italian social theorist Vilfredo Pareto with a highly readable English translation of Pareto's last monograph *Generalizations* originally published in 1920 this work illustrates how and why democratic forms of government undergo decay and are eventually reinvigorated More than any other social scientist of his generation Pareto offers a well developed articulate and compelling theory of change based on a Newtonian vision of science and an engineering model of social equilibrium This dynamic involves a shifting balance among the countervailing forces of centralization and decentralization of power economic expansion and contraction and liberalism versus traditionalism in public sentiment By 1920 Pareto had developed a scheme for predicting shifts in magnitude of these forces and subsequent change in the character of society This book will be of interest to students teachers or general readers interested in political science sociology and late nineteenth early twentieth century social theory Vilfredo Pareto 1848 1923 was a pioneer in the field of econometrics but gained fame most of it posthumous through his contributions to sociology and political science Though often claimed by activist rightist groups and a contributor to fascist thinking he avoided alignment with any political movement *The Rise and Fall of the Elites: an Application of Theoretical Sociology* Vilfredo Pareto, 1968

The Rise and Fall of the Elites; an Application of Theoretical Sociology. Introd. by Hans L. Zetterberg Vilfredo Pareto, 1968 *Human Hierarchies* Melvyn L. Fein, 2017-09-08 Human beings are hierarchical animals Always and everywhere people have developed social ranking systems These differ dramatically in how they are organized but the underlying causal mechanisms that create and sustain them are the same Whether they are on the top or bottom of the heap people attempt to be superior to some other persons or group This is the root of Melvyn L Fein's thesis presented in *Human Hierarchies A General Theory* Fein traces the development of changes from hunter gatherer times to our own techno commercial society In moving from small to large communities humans went

from face to face contests for superiority to more anonymous and symbolic ones Societies evolved from hunting bands where the parties knew each other through big men societies chieftainships agrarian empires patronage chains caste societies estate systems and market oriented democracies Where once small groupings were organized primarily by strong forces such as personal relationships the now standard large groupings are more dependent on weaker forces such as those provided by social roles Bureaucracies and professional roles have become prominent Bureaucracies allow large scale organizations to maintain control of people by limiting the potential destructiveness of unregulated tests of strength and by clarifying chains of command Their rigidity and unresponsiveness requires that they be supplemented by professional roles At the same time a proliferation of self motivated experts delegate authority downward thereby introducing a more flexible decentralization This analysis is a unique and significant advance in both the sociology and anthropology of stratification among humans

Evolution Versus Revolution Melvyn L. Fein, 2017-07-05 Revolutionary and evolutionary theorists have very different views about change Fein writes in favour of evolution He proposes an integrated model of social evolution one that accounts for the complexity inconclusiveness and impediments that characterize social transformations This multi dimensional approach recognizes that change is always saturated in conflict Major changes are rarely initiated by conscious decisions that are automatically implemented power and morality generally control the direction that significant alterations take Fein explains how the social generalist dilemma places our need for both flexibility and stability in opposition to each other such that non rational mechanisms are needed to produce a solution He also describes how an inverse force rule dictates that small societies are bound together by strong social forces whereas large ones are secured by weak forces This suggests that social roles are likely to become professionalized over time If social change is in fact analogous to natural rather than artificial selection we may be in the midst of an only partially predictable middle class revolution Indeed the current impasse between liberals and conservatives may be evidence that we are in the consolidation phase of this process Should this be the case a paradigm shift not a classical revolution is in our future

Post-Liberalism Melvyn L. Fein, 2017-07-05 Liberalism is dying despite its superficial appearance of vigor Most of its adherents still believe it is the wave of the future but they are clinging to a sinking dream So says Melvyn L Fein who argues that liberalism has made countless promises almost none of which have come true Under its auspices poverty was not eliminated crime did not diminish the family was not strengthened education was not improved nor was universal peace established These failures were not accidental they flow directly from liberal contradictions In Post Liberalism Fein demonstrates why this is the case Fein contends that an inverse force rule dictates that small communities are united by strong forces such as personal relationships and face to face hierarchies while large scale societies are integrated by weak forces such as technology and social roles As we become a more complex techno commercial society the weak forces become more dominant This necessitates greater decentralization in direct opposition to the centralization that liberals celebrate Paradoxically this suggests that liberalism as an ideology is regressive rather than

progressive If so it must fail Liberals assume that some day under their tutelage these trends will be reversed but this contradicts human nature and history s lessons According to Fein we as a species are incapable of eliminating hierarchy or of loving all other humans with equal intensity Neither as per Emile Durkheim are we able to live in harmony without appropriate forms of social cohesion

Sultanistic Regimes Houchang E. Chehabi,Juan J. Linz,1998-06-05 Authoritarian governments are often based on raw power sustained by fear of punishment and hope of reward This text identifies common characteristics of such regimes comparing them to totalitarian and authoritarian forms of government and tracing common patterns for their genesis and demise
