The Rise of the Networking Region Are Vegard Haug, 2016-02-17

How regions and cities adapt to a Network Society and a globalized environment the policies they pursue and how structures of governance are transformed in the pursuit of those policies are major themes in this volume These issues are addressed with specific reference to the Nordic regions of Europe Covering the four Nordic countries of Denmark Finland Norway and Sweden plus the Faroe Islands this volume charts the changes in networking activities and related development initiatives that have taken place over the last ten years This means analysing regions in their pursuit of new policies partnerships and styles of representation Through this process regions are becoming partners and players in European integration and a movement of integrative regionalism is taking shape which is different from inward looking identity regionalism or self centred competitive regionalism and takes regions beyond lobbying in Brussels

Network Society Roberta Iannone, Emanuela Ferreri, Maria Cristina Marchetti, Laura Mariottini, Manuela Ciprì, 2020-10-06

The present volume attempts to critically evaluate claims that modern society may be read and understood as a network Accepting that this perspective holds some potential the question becomes how to best capitalize on it To analyze society as a network means to respond not only to the actual needs but also to highlight the opportunities and the utilities and to investigate whether society is increasingly relational or just perceived as such as e g digital social networks and related concepts exemplify From a strictly scientific perspective to answer the question how to read society as a network means to ask ourselves a if the conceptual categories especially the concepts of structure and exchange and the paradigms of traditional analysis holism and individualism both in the functionalist and the conflictive versions are still sufficient b if new conceptual categories theories instruments are needed to represent more properly the reality we face to investigate it to explain it or at least to understand it Starting from a reflection on already established social networks Scott 2003 the fundamental differences between groups and networks Vergati 2008 the logics of networks Serra 2003 as well as social capital formation and links Di Nicola 2006 Mutti 1998 we seize the spatial dynamics seemingly following opposite paths but which revert to a common denominator de spatialization and re spatialization namely the processes of dematerialization of space s and its reconstruction by specific relational dynamics and forms The study of networks is therefore not attributable to a single theory but to several theories converging towards a unique perspective spaces and logical reasoning Serra 2001 each one with its own uniqueness The strength of this volume and the difference with respect to other attempts at explaining the Network Society lies in the multidimensional and interrelated perspectives it offers emerging from converging multidisciplinary perspectives sociological anthropological and linguistic and from applications that the Network Society provides namely international European Governance institutional public linguistic landscape of the city of Rome and mediated ones communication technology
