Risks And Decisions For Conservation And Environmental Management:

Risks and Decisions for Conservation and Environmental Management Mark Burgman, 2005-04-07 This book outlines how to conduct a complete environmental risk assessment The first part documents the psychology and philosophy of risk perception and assessment introducing a taxonomy of uncertainty and the importance of context It provides a critical examination of the use and abuse of expert judgement and goes on to outline approaches to hazard identification and subjective ranking that account for uncertainty and context The second part of the book describes technical tools that can assist risk assessments to be transparent and internally consistent These include interval arithmetic ecotoxicological methods logic trees and Monte Carlo simulation These methods have an established place in risk assessments in many disciplines and their strengths and weaknesses are explored The last part of the book outlines some new approaches including p bounds and information gap theory and describes how quantitative and subjective assessments can be used to make transparent decisions

Application of Threshold Concepts in Natural Resource Decision Making Glenn R. Guntenspergen, 2014-02-07 Natural resource managers face a complex decision making environment characterized by the potential occurrence of rapid and abrupt ecological change These abrupt changes are poorly accommodated by traditional natural resource planning and decision making processes As recognition of threshold processes has increased contemporary models of ecological systems have been modified to better represent a broader range of ecological system dynamics Key conceptual advances associated with the ideas of non linear responses the existence of multiple ecological stable states and critical thresholds are more likely the rule than the exception in ecological systems Once an ecological threshold is crossed the ecosystem in question is not likely to return to its previous state There are many examples and a general consensus that climatic disruptions will drive now stable systems across ecological thresholds This book provides professional resource managers with a broad general decision framework that illustrates the utility of including ecological threshold concepts in natural resource management It gives an entry into the literature in this rapidly evolving concept with descriptions and discussion of the promising statistical approaches for threshold detection and demonstrations of the utility of the threshold framework via a series of case studies

Environmental Impact Assessment Rachna Bhateria, Mona Sharma, Rimmy Singh, Sumit Kumar, 2024-08-17 This book will cover the basic principles and salient features of EIA The authors attempt to cover the shortcomings observed in EIA reports the manner of conducting EIA for proposed projects and also to facilitate the preparation of good quality EIA reports The book is written in a straightforward format avoiding long descriptive texts to enhance the reader experience Although the focus is on the Indian context the concepts and techniques of EIA described in this book are applicable universally An Environmental Management Plan EMP is also discussed and this is an essential aspect of EIA in countries where priority is on economic development by way of development projects and when the EIA process has inherent weaknesses For the continual improvement of EIA reports EIA consultants maybe assigned the task of implementing

and operationalizing the suggested EMP in addition to conducting an EIA study and in preparation of an EIA report The system of peer review of EIA reports is also expected to improve EIA quality Environmental Impact Assessment A Journey to Sustainable Development is an attempt to cover EIA according to new knowledge acquired through research and experiences which will make this tool more versatile and dynamic The authors recognise that since EIA is continuously expanding and developing there will always be potential for improving the scope of this book to make it more useful to the users as per their requirement This book will be of interest to academics EIA professionals and consultants EIA review appraisal authorities and particularly stakeholders in emerging economies where major developmental work is being undertaken and which is expected to continue in decades to come

Australia's Megafires Libby Rumpff, Sarah M. Legge, Stephen van Leeuwen, Brendan A. Wintle, John C.Z. Woinarski, 2023-02-01 The Australian wildfires of 2019 20 Black Summer were devastating and unprecedented These megafires burnt more than 10 million hectares mostly of forests in southern and eastern Australia Many of the fires were uncontrollable These megafires affected many of Australia s most important conservation areas and severely impacted threatened species and ecological communities They were a consequence of climate change and offered a glimpse of how this is likely to continue to affect our future Australia s Megafires includes contributions by more than 200 researchers and managers with direct involvement in the management and conservation of the biodiversity affected by the Black Summer wildfires It provides a comprehensive review of the impacts of these fires on all components of biodiversity and on Indigenous cultural values These fires also triggered an extraordinary and highly collaborative response by governments NGOs Indigenous groups scientists landholders and others seeking to recover the fire affected species and environments to restore Country This book documents that response It draws lessons that should be heeded to sustain that recovery and to be better prepared for the inevitable future comparable catastrophes Such lessons are of global relevance for wildfires increasingly threaten biodiversity and livelihoods across the globe

Risk analysis in aquaculture Lind, C.E., Dana, G.V., Perera, R.P., Phillips, M.J., 2015-04-07 This publication is based on materials covered and outputs generated during the Workshop on Risk Assessment Methodologies and Tools for Aquaculture in Sub Saharan Africa which was jointly held by WorldFish and FAO in Siavonga Zambia on 28 June 2 July 2010 The workshop was delivered as a training exercise to 17 participants from seven sub Saharan countries and was designed to highlight current methodologies and tools available for environmental risk analysis in aquaculture development A key focus of the workshop was to encourage participants to consider hypothetical but realistic scenarios and to discuss issues relevant to evaluating the environmental risks of a given activity or scenario This publication presents selected scenarios from the workshop and the outcomes of the deliberative process as developed by the participants This publication is factual but not comprehensive therefore any statements or estimations of risk do not represent the actual risks arising from the described scenario It is intended to serve as an easily readable introduction to risk analysis highlighting worked examples that will provide guidance on how a risk analysis may be approached in a similar situation

Methods of Environmental Impact Assessment Peter Morris, Riki Therivel, 2009-03-05 Environmental impact assessment EIA is now firmly established as an important and often obligatory

part of proposing or launching any development project Delivering a successful EIA needs not only an understanding of the theory but also a detailed knowledge of the methods for carrying out the processes required Peter Morris and Riki Therivel bring together the latest advice on best practice from experienced practitioners to ensure an EIA is carried out correctly This new edition explains how an EIA works and how it should be carried out demonstrates the relationship of the EIA to socio economic environmental and ecological systems includes completely updated legislative and policy contexts has added explanations of shared and integrative methods including a new chapter on EIA and sustainability Invaluable to undergraduate and MSc students of EIA in planning ecology geography and environment courses this third edition of Methods of Environmental Impact Assessment is also of great use to planners EIA practitioners and professionals seeking to update their skills

Environmental Risk Assessment of Genetically Modified Organisms K.R. Hayes, S. Li, 2007 The decline of many individual and wild fish stocks has commanded an increase in aquaculture production to meet the protein demands of a growing population Alongside selective breeding schemes and expanding facilities transgenic methods have received increasing attention as a potential factor in meeting these demands With a focus on developing countries this third text in the series provides detailed information on environmental biosafety policy and regulation and presents methodologies for assessing ecological risks associated with transgenic fish Publisher website http://www.cabi.org/bk_BookDisplay.asp?PID=2054 viewed 6 December 2007

Effective Risk Communication Joseph Arvai, Louie Rivers III, 2013-10-30 There are two questions often asked of risk communication what has been learned from past work and what is needed to push the field forward Drawing on the experience of leading risk researchers and practitioners Effective Risk Communication focuses on answering these questions The book draws together new examples of research and practice from contexts as diverse as energy generation human health nuclear waste climate change food choice and social media This book treats risk communication as much more than the interchange of risk information between experts and non experts rather it aims to emphasise the diversity in viewpoints and practices In each specially commissioned chapter the authors reflect on the theoretical and applied underpinnings of their best projects and comment on how their approach could be used effectively by others Building upon each other the chapters will provoke new discussion and action around a discipline which many feel is neither meeting important needs in practice nor living up to its potential in research Through a more careful examination of the work already done in risk communication the book will help develop better more reflective practice for the future
