Risks at Sea Frank C. Spooner, 2002-07-04 This book places the marine insurance business of Amsterdam in the wider context of the political economy of Europe during the second half of the eighteenth century The analysis is based on the simultaneous quotations of premiums for the twenty two groups of destinations which formed a major part of the commercial matrix of the Netherlands It considers the operation of the market at two levels On the one hand the provision of insurance responded to risk uncertainties in the market in the 1760s and 1770s Amsterdam experienced three serious upheavals in the form of the financial crises of 1763 and 1772-73 and the hostilities leading to American independence and the Fourth Anglo-Dutch War On the other hand underwriters accepted risks in situations of structural uncertainty The book is fully illustrated with graphs and maps and uses a wide range of original documents drawn from archives and libraries in Europe An appendix provides the basic data of premiums quoted in the price lists of the market

The 'Mother of all Trades' Milja van Tielhof, 2021-12-28 In the early modern period the Dutch called the grain trade on the Baltic the mother of all trades as they considered it to be the basis of most of their trade and shipping and indeed the cornerstone of the Dutch economy. For a very long time the mass grain exports from the Baltic were dominated by the Dutch and Amsterdam was the central entrepôt from which the grain was distributed over the Dutch hinterland and the rest of Europe. This book aims to present a general history of the mother of all trades and particularly shows the fundamental importance for transaction costs including the costs for transport, insurance and protection, the quality of the local services sector in Amsterdam, the influence of monetary and mercantile policies and the efficiency of trade organization.
