Mobile Cinema in Kham Tibetan Areas Jianbin Guo, Jingjing Chen, 2024-07-31 This book presents the restoration of rural mobile cinema network in the Great Triangle region at the conjunction of Yunnan Sichuan and Tibet in China in the new century which has added a new chapter to the long standing complex relationship between cinema and social change Based on five years of multi sited fieldwork abundant interviews and oral history narratives this work shows the entanglement of the State the projectionists and local film viewers in the historical and social context in a holistic analytic framework By using the key concept of being present to examine the tangling relations between the actors in mobile cinema as social practice the work argues that mobile cinema and contemporary Chinese society are mutually constructed in both textual and practical level

Algorithms Ignacio Siles, 2023-04-25 A nuanced account from a user perspective of what it s like to live in a datafied world We live in a media saturated society that increasingly transforms our experiences relations and identities into data others can analyze and monetize Algorithms are key to this process surveilling our most mundane practices and to many their control over our lives seems absolute In *Living with Algorithms* Ignacio Siles critically challenges this view by surveying user dynamics in the global south across three algorithmic platforms Netflix Spotify and TikTok and finds surprisingly a more balanced relationship Drawing on a wealth of empirical evidence that privileges the user over the corporate Siles examines the personal relationships that have formed between users and algorithms as Latin Americans have integrated these systems into the structures of everyday life enacted them ritually participated in public with and through them and thwarted them Sometimes users follow algorithms Siles finds and sometimes users resist them At times users do both Agency lies in the navigation of the spaces in between By analyzing what we do with algorithms rather than what algorithms do to us *Living with Algorithms* clarifies the debate over the future of datafication and whether we have a say in its development

Concentrating on an understudied region of the global south the book provides a new perspective on the commonalities and differences among users within a global ecology of technologies **The God Strategy** David Domke, Kevin Coe, 2008 This volume offers a timely and dynamic study of the rise of religion in American politics examining the public messages of

Nonlinear Models for Archaeology and Anthropology William W. Baden, 2016-12-05 The dominant social theory used by archaeologists has tended to focus on either small scale agency or large scale cultural patterns and processes of change The authors of this volume argue that archaeologists should use nonlinear models to more accurately model the connections between scales of analysis and show how micro scale variation can lead to macro scale cultural change This work examines the applications of nonlinear systems models within archaeology and evaluates the range of approaches currently encompassed within Complexity Theory
