Robinson's Paradigms and Exercises in Syriac Grammar J. F. Coakley, 2013-07-26 T H Robinson's Paradigms and exercises in Syriac Grammar was first published in 1915 to meet the need for something of an elementary nature which should be of value to the student who takes up Syriac for the first time Since then the book has met this need for generations of students The fifth edition of 2002 remains the grammar of choice for many teachers of Syriac classes as well as for students learning by themselves The present revision drawing on ten more years of university teaching experience and students comments clarifies some of the grammatical explanations and exercises Improvements to the fonts and a larger format make for easier reading As before the West Syriac script and grammatical tradition are followed in the body of the lessons and appendices introduce reading in the other estrangela and Eastern scripts The book remains a plain and friendly introduction to this important language

**Robinson's Paradigms and Exercises in Syriac Grammar** Theodore Henry Robinson, 2002 T H Robinson published Paradigms and Exercises in Syriac Grammar in 1915 to meet the need for something of an elementary nature which should be of value to the student who takes up Syriac for the first time Since then the book has met this need for generations of students Still teachers have recognized its weaknesses and this fifth edition is a thorough revision Much of the old explanatory text and many of the exercises have been superseded Some matters of grammar and pronunciation receive more systematic treatment and there are new appendices to introduce the estrangela and East Syriac scripts In its format and level however the book aims to be as before an approachable introduction to this important language

Third Edition** Theodore Henry Robinson,1949      **Points of Contact** Nick Posegay,2021-12-14 In the first few centuries of Islam Middle Eastern Christians Muslims and Jews alike all faced the challenges of preserving their holy texts in the midst of a changing religious landscape This situation led Syriac Arabic and Hebrew scholars to develop new fields of linguistic science in order to better analyse the languages of the Bible and the Qur n Part of this work dealt with the issue of vocalisation in Semitic scripts which lacked the letters required to precisely record all the vowels in their languages Semitic scribes thus developed systems of written vocalisation points to better record vowel sounds first in Syriac then soon after in Arabic and Hebrew These new points opened a new field of linguistic analysis enabling medieval grammarians to more easily examine vowel phonology and explore the relationships between phonetics and orthography Many aspects of this new field of vocalisation crossed the boundaries between religious communities first with the spread of relative vocalisation systems prior to the eighth century and later with the terminology created to name the discrete vowels of absolute vocalisation systems This book investigates the theories behind Semitic vocalisation and vowel phonology in the early medieval Middle East tracing their evolution to identify points of intellectual contact between Syriac Arabic and Hebrew linguists before the twelfth century      *The Other Lands of Israel* Liv Lied,2008-11-30 According to the current scholarly consensus the apocalypse of 2 Baruch written after the Fall of Jerusalem either rejected the concept of the Land of Israel as a place of salvation or regarded it as of minor importance Inspired by the perspective of Critical Spatial Theory this book discusses the presuppositions behind this consensus with regard to the spatial epistemology it assumes and explores the conception of the Land as a broad redemptive category The result is a fresh portrait of the vitality of the Land theme in the first centuries of the common era and a new perspective on the spatial imagination of 2 Baruch      *The American Journal of Theology* University of Chicago.
