RoboCup 2002: Robot Soccer World Cup VI Gal A. Kaminka, Pedro U. Lima, Raul Rojas, 2003-11-11 RoboCup 2002 the 6th Robot World Cup Soccer and Rescue Competitions and Conference took place during June 19 25 2002 at the Fukuoka Dome main venue in Fukuoka Japan It was by far the RoboCup event with the largest number of registered participants 1004 persons distributed in 188 teams from 29 countries and visitors around 120 000 persons As was done in its previous editions since 1997 the event included several robotic competitions and an international symposium The papers and posters presented at the symposium constitute the main part of this book League reports in the national section describe significant advances in each league and the results The symposium organizers received 76 submissions among which 17 papers 22% were accepted for oral presentation at the symposium first section of the book and 21 papers 29% were accepted as posters second section of the book Most papers were evaluated by three reviewers each chosen from the members of the International Program Committee IPC The IPC consisted of a balanced combination of regular RoboCup participants and researchers from outside this community The reviewers worked hard to guarantee a fair review process the result of their work was a high quality symposium with very interesting presentations

RoboCup 2004: Robot Soccer World Cup VIII Daniele Nardi, Martin Riedmiller, Claude Sammut, José Santos-Victor, 2005-03-23 These are the proceedings of the RoboCup 2004 Symposium held at the Instituto Superior Técnico in Lisbon Portugal in conjunction with the RoboCup competition The papers presented here document the many innovations in robotics that result from RoboCup A problem in any branch of science or engineering is how to devise tests that can provide objective comparisons between alternative methods In recent years competitive engineering challenges have been established to motivate researchers to tackle difficult problems while providing a framework for the comparison of results RoboCup was one of the first such competitions and has been a model for the organization of challenges following sound scientific principles In addition to the competition the associated symposium provides a forum for researchers to present refereed papers But for RoboCup the symposium has the greater goal of encouraging the exchange of ideas between teams so that the competition as a whole progresses from year to year and strengthens its contribution to robotics One hundred and eighteen papers were

submitted to the Symposium Each paper was reviewed by at least two international referees 30 papers were accepted for presentation at the Symposium as full papers and a further 38 were accepted for poster presentation The quality of the Symposium could not be maintained without the support of the authors and the generous assistance of the referees

EurAsia-ICT 2002: Information and Communication Technology M. Hassan Shafazand, A Min Tjoa, 2003-06-30 We welcomed participants to the 1st EurAsian Conference on Advances in Information and Communication Technology EurAsia ICT 2002 held in Iran The aim of the conference was to serve as a forum to bring together researchers from academia and commercial developers from industry to discuss the current state of the art in ICT mainly in Europe and Asia Inspirations and new ideas were expected to emerge from intensive discussions during formal sessions and social events Keynote addresses research presentation and discussion during the conference helped to further develop the exchange of ideas among the researchers developers and practitioners who attended The conference attracted

more than 300 submissions and each paper was reviewed by at least three program committee members. The program committee selected 119 papers from authors of 30 different countries for presentation and publication, a task which was not easy due to the high quality of the submitted papers. Eleven workshops were organized in parallel with the EurAsia ICT conference. The proceedings of these workshops with more than 100 papers were published by the Austrian Computer Society. We would like to express our thanks to our colleagues who helped with putting together the technical program, the program committee members and external reviewers for their timely and rigorous reviews of the papers, and the organizing committee for their help in administrative work and support. We owe special thanks to Thomas Schierer for always being available when his helping hand was needed.

Distributed Autonomous Robotic Systems 5 H. Asama, T. Arai, T. Fukuda, T. Hasegawa, 2012-12-06. The 6th International Symposium on Distributed Autonomous Robotic Systems DARS 2002 was held in Fukuoka, Japan, a decade after the first DARS symposium was convened. This book, containing the proceedings of the symposium, provides broad coverage of the technical issues in the current state of the art in distributed autonomous systems composed of multiple robots, robotic modules, or robotic agents. DARS 2002 dealt with new strategies for realizing complex, modular, robust, and fault-tolerant robotic systems, and this volume covers the technical areas of system design, modeling, simulation, operation, sensing, planning, and control. The papers included here were contributed by leading researchers from Asia, Oceania, Europe, and the Americas, and make up an invaluable resource for researchers and students in the field of distributed autonomous robotic systems.

Intelligent Autonomous Robotics Peter Stone, 2022-05-31. Robotics technology has recently advanced to the point of being widely accessible for relatively low-budget research, as well as for graduate, undergraduate, and even secondary and primary school education. This lecture provides an example of how to productively use a cutting-edge advanced robotics platform for education and research by providing a detailed case study with the Sony AIBO robot, a vision-based legged robot. The case study used for this lecture is the UT Austin Villa RoboCup Four Legged Team. This lecture describes both the

development process and the technical details of its end result The main contributions of this lecture are i a roadmap for new classes and research groups interested in intelligent autonomous robotics who are starting from scratch with a new robot and ii documentation of the algorithms behind our own approach on the AIBOs with the goal of making them accessible for use on other vision based and or legged robot platforms
