C. Newport, 2014-12-05 The Apocalypse or end times are a recurrent theme within contemporary popular culture The End All Around Us presents a wide ranging exploration of the influence of the apocalypse within art literature music and film The essays draw on representations of the apocalypse in heavy metal music science fiction disaster movies and anime The book examines key apocalyptic texts focusing on their relevance to today It will be invaluable to all those interested in the religious and cultural impact of apocalyptic thought **Robot Ecology and the Science Fiction Film** J. P. Telotte, 2016-01-22 This book offers the first specific application in film studies of what is generally known as ecology theory shifting attention from history to the in this case media environment It takes the robot as its subject because it has attained a status that resonates not only with some of the key concerns of contemporary culture over the last century but also with the very nature of film While the robot has given us a vehicle for exploring issues of gender race and a variety of forms of otherness and increasingly for asking questions about the very nature and meaning of life this image of an artificial being typically anthropomorphic also

invariably implicates the cinema's own and quite fundamental artificing of the human Looking across genres across specific media forms and across closely linked conceptualizations Telotte sketches a context of interwoven influences and meanings The result is that this study of the cinematic robot while mainly focused on science fiction film also incorporates its appearance in for example musicals cartoons television advertising toys and literature The Handbook of the Psychology of Communication Technology S. Shyam Sundar, 2015-01-20 The Handbook of the Psychology of Communication Technology offers an unparalleled source for seminal and cutting edge research on the psychological aspects of communicating with and via emergent media technologies with leading scholars providing insights that advance our knowledge on human technology interactions A uniquely focused review of extensive research on technology and digital media from a psychological perspective Authoritative chapters by leading scholars studying psychological aspects of communication technologies Covers all forms of media from Smartphones to Robotics from Social Media to Virtual Reality Explores the psychology behind our use and abuse of modern communication technologies New theories and empirical findings about ways in which our lives are transformed by digital media **Robot Zombies** Xaviant Haze, Estrella Equino, 2015-09-28 How advanced is the technology that exists today what are we using it for and can machines turn on their human creators What is transcendence and why will we all be familiar with it Technology is growing exponentially and the moment when it merges with the human mind called The Singularity is visible in our imminent future Can humans limited by slow biological evolution compete with synthetic intelligence Science and technology are pushing forward transforming life as we know it perhaps even giving humans a shot of immortality Who will benefit from this Where did the idea of robots originate and why are humans fearful of decision making robots that may be able to create goals and objectives and work toward achieving them This book examines the history and future of robotics artificial intelligence zombies and a Transhumanist utopia dystopia integrating man with machine How did it all begin and what s in store for humans today in the near future and in the distant future Haze and Eguino explore the fascinating role of artificial intelligence from a practical human perspective and discover that the mind altering process necessary to accept and integrate with the inevitable is already underway molding human consciousness 4 Page Color Section Emotions and Service in the Digital Age Charmine E.
