How a visionary university and foundation president tackled some of the thorniest problems facing higher education As provost and then president of Princeton University William G Bowen 1933 2016 took on the biggest and most complex challenges confronting higher education cost disease inclusion affirmative action college access and college completion Later as president of the Andrew W

Mellon Foundation he took his vision for higher education and the strategies for accomplishing that vision to a larger arena. Along the way he wrote a series of influential books including the widely read *The Shape of the River* coauthored with Derek Bok which documented the success of policies designed to increase racial diversity at elite institutions. In *Changing the Game* drawing on deep archival research and hundreds of interviews Nancy Weiss Malkiel argues that Bowen was the most consequential higher education leader of his generation. Bowen who became Princeton's president in 1972 at the age of 38 worked to shore up the university's financial stability implement coeducation and create a more inclusive institution. Breaking through the traditional Ivy League demographics of white Protestant and male he embraced equal access in admissions for women and men and actively sought to enroll Black Hispanic and Asian American students. To increase the intellectual muscle of the faculty he used targeted recruiting and enforced higher scholarly standards. In 1988 Bowen moved on to Mellon where among many other accomplishments he developed digital research tools most notably JSTOR and promoted racial diversity through the Mellon Mays Undergraduate Fellowship. Attacking problems with tenacity insight and deep knowledge Bowen showed the world of higher education how a visionary leader can transform an institution.
