**Polyphony Embodied - Freedom and Fate in Gao Xingjian's Writings** Michael

Lackner, Nikola Chardonnens, 2014-06-23 Like artists important writers defy unequivocal interpretations Gao Xingjian winner of the Nobel Prize in literature is a cosmopolitan writer deeply rooted in the Chinese past while influenced by paragons of Western Modernity The present volume is less interested in a general discussion on the multitude of aspects in Gao's works and even less in controversies concerning their aesthetic value than in obtaining a response to the crucial issues of freedom and fate from a clearly defined angle The very nature of the answer to the question of freedom and fate within Gao Xingjian's works can be called a polyphonic one there are affirmative as well as skeptical voices But polyphony as embodied by Gao is an even more multifaceted phenomenon Most important for our contention is the fact that Gao Xingjian's aesthetic experience embodies prose theater painting and film Taken together they form a Gesamtkunstwerk whose diversity of voices characterizes every single one of them *East Central European Art Histories and Austria* Karolina Majewska-Güde, Monika Leisch-Kiesl, 2024-05-06

The specific role of the Austro-Hungarian Empire and the later nation of Austria within the formation of regional art histories in East Central Europe has received little attention in art historical research so far Taking into account the era of the Dual Monarchy as well as the period after 1989 the contributions analyze and critically scrutinize the imperial legacies transnational transfer processes and cultural hierarchies in art historiographies artistic practices and institutional histories Consisting of 17 texts with new commissions and one reprint case studies monographic essays and interviews grouped thematically into two sections the anthology proposes a pluriversal narrative on regional cultural and political contexts *Empires of Print* Patrick Scott Belk, 2017-05-08 At the turn of the twentieth century the publishing industries in Britain and the United States underwent dramatic expansions and reorganization that brought about an increased traffic in books and periodicals around the world Focusing on adventure fiction published from 1899 to 1919 Patrick Scott Belk looks at authors such as Joseph Conrad H G Wells Conan Doyle and John Buchan to explore how writers of popular fiction engaged with foreign markets and readers through periodical publishing Belk argues that popular fiction particularly the adventure genre developed in ways that directly correlate with authors' experiences and shows that popular genres of the late nineteenth and early twentieth centuries emerged as one way of marketing their literary works to expanding audiences of readers worldwide Despite an over-determined print space altered by the rise of new kinds of consumers and transformations of accepted habits of reading publishing and writing the changes in British and American publishing at the turn of the twentieth century inspired an exciting new period of literary invention and experimentation in the adventure genre and the greater part of that invention and experimentation was happening in the magazines

**Fighting Hurt** Henry Shue, 2016-03-24 Some of our most fundamental moral rules are violated by the practices of torture and war If one examines the concrete forms these practices take can the exceptions to the rules necessary to either torture or war be justified *Fighting Hurt* brings together key essays by Henry Shue on the issue of torture and relatedly the moral challenges surrounding the initiation and conduct of war and features a new introduction outlining the argument of the

essays putting them into context and describing how and in what ways his position has modified over time The first six chapters marshal arguments that have been refined over 35 years for the conclusion that torture can never be justified in any actual circumstances whatsoever The practice of torture has nothing significant in common with the ticking bomb scenario often used in its defence and weak U S statutes have loop holes for psychological torture of the kind now favoured by CIA in the war against terrorism The other sixteen chapters maintain that for as long as wars are in fact fought it is morally urgent to limit specific destructive practices that cannot be prohibited Two possible exceptions to the UN Charter s prohibition on all but defensive wars humanitarian military intervention and preventive war to eliminate WMD are evaluated and one possible exception to the principle of discrimination Michael Walzer s supreme emergency is sharply criticized Two other fundamental issues about the rules for the conduct of war receive extensive controversial treatment The first is the rules to limit the bombing of dual use infrastructure with a focus on alternative interpretations of the principle of proportionality that limits collateral damage The second is the moral status of the laws of war as embodied in International Humanitarian Law It is argued that the current philosophical critique of IHL by Jeff McMahan focused on individual moral liability to attack is an intellectual dead end and that the morally best rules are international laws that are the same for all fighters Examining real cases including U S bombing of Iraq in 1991 the Clinton Administration decision not to intervene in the 1994 Rwandan genocide NATO bombing of Serbia in 1999 and CIA torture after 9 11 and its alternatives this book is highly accessible to general readers who are interested in the ethical status of American political life especially foreign policy Killing Terrorists Anna Goppel,2013-01-30 Targeted killing of terrorists has become an established practice in the fight against terrorism The disturbing consequences of the practice and its increasing political and societal acceptance raise questions as to its justifiability and its place in counter terrorism Anna Goppel explores whether targeted killing of terrorists can be justified both from a moral and an international legal perspective She discusses moral and international legal limits to state use of lethal force and argues that the moral principles and the international legal regulations allow for the practice only in very specific very rare and rather hypothetical cases The analysis is based on a thorough discussion of the human right to life the laws and ethics of war and the relevant moral and legal arguments This makes it of particular interest to philosophers and legal theorists interested in terrorism counter terrorism human rights and the legitimacy of defensive state measures

*Picasso and Apollinaire* Peter Read,2008-04-02 Monografie over de vriendschap en creatieve interactie tussen de Spaans Franse kunstenaar 1881 1973 en de Franse dichter 1880 1918 *Stieglitz and His Artists* Metropolitan Museum of Art (New York, N.Y.),Magdalena Dabrowski,2011 A master photographer Alfred Stieglitz was also a visionary promoter and avid collector of modern American and European art from the first half of the 20th century This book is the first fully illustrated catalogue of works in the unparalleled Alfred Stieglitz Collection which was given to the Metropolitan Museum after Stieglitz s death **Subject Guide to Books in Print** ,1971 Pierre Puvis de Chavannes Aimée Brown Price,2010 An artist of

pivotal importance to the generation of post Impressionists from Seurat and Gauguin to Matisse and Picasso Pierre Puvis de Chavannes 1824 1898 played a crucial role in the history of late 19th century French art and the development of modernism He was an artist of great range originality and idiosyncratic invention who executed mural complexes compelling easel paintings and numerous works on paper These two companion volumes a critical study of the artist s life and art and a catalogue raisonné of his paintings introduce many of Puvis s works for the first time assess his contribution and restore him to the pantheon of modern masters Volume I situates Puvis and his work in his time With a wealth of new documentation it addresses the theories forces and events that impinged on his art Volume II is a complete compendium of Puvis s easel paintings and mural cycles for civic buildings throughout France as well as for the Boston Public Library

**Material Bernini** Evonne Levy, Carolina Mangone, 2016-04-14 Bringing together established and emerging specialists in seventeenth century Italian sculpture *Material Bernini* is the first sustained examination of the conspicuous materiality of Bernini s work in sculpture architecture and paint The various essays demonstrate that material Bernini has always been tied whether theologically geologically politically or in terms of art theory to his immaterial twin Here immaterial Bernini and the historiography that sustains him is finally confronted by material Bernini Central to the volume are Bernini s works in clay a fragmentary record of a large body of preparatory works by a sculptor who denied any direct relation between sketches of any kind and final works Read together the essays call into question why those works in which Bernini s bodily relation to the material of his art is most evident his clay studies have been configured as a point of unmediated access to the artist s mind to his immaterial ideas This insight reveals a set of values and assumptions that have profoundly shaped Bernini studies from their inception and opens up new and compelling avenues of inquiry within a field that has long remained remarkably self enclosed

**Science & Perception** Michael Weaver, 2018-02-18 The history of science in the West can be traced back almost 2500 years to a time when science religion and the arts all fell under a single discipline the area of study known as Natural Philosophy or Philosophia Naturalis The philosophers of this time period individuals such as Pythagoras Plato and Euclid literally set the stage for much of modern science developing tools that are still used to this day Despite the large swaths of time that have managed to pass instruments such as number and geometry have remained essentially unchanged as evidenced by the continued publication and translation of texts such as Euclid s *Elements* While many of the tools used by modern science can be traced back to the Platonic and Neoplatonic schools of thought the current scientific world view is more closely aligned with an altogether different school of thinking Philosophers such as Democritus posited that the objects found within the physical world were actually composed of small discrete parts a world view still held by most of the modern world to this day Few people stop to consider that this perspective the atomistic view of the world is in direct contradiction to the principles espoused by Pythagoras and Plato This book provides a modern interpretation for the Platonic model of the Universe by making use of both dialogue and diagrams the same techniques employed by Plato and

Euclid more than 2000 years ago to explain their ideas      Cannabis Use and Dependence Wayne Hall, Rosalie Liccardo Pacula, 2003-11-28 The use of cannabis in the late twentieth and this century is an area of medical and moral controversy Despite its illegality cannabis is the most widely used drug after alcohol and tobacco among young adults in the USA Europe and Australia This book explores the relationship between health policy public health and the law regarding cannabis use It assesses the impact of illegality in drug use and relates this to policy analysis in Australia the UK the US and other developed societies It evaluates debates about safe use and harm minimisation approaches as well as examining the experiences of different prevention treatment and education policies Written by two leading drug advisors Cannabis Use and Dependence makes a valuable addition to this important field of research      **Proportionality in International Law** Michael A.
