**The Immunologic Revolution** Andor Szentivanyi, Herman Friedman, 2024-11-15 This unique volume contains reviews by some of the most prominent immunologists in the world The authors present vital facts for each of their areas of expertise and provide individual perspectives on how their own contributions were developed and how these contributions influenced general immunological thinking and development This impressive collection of personal reviews by these internationally renowned immunologists makes The Immunologic Revolution an important and lasting contribution to the entire biomedical community      *Modulation of Host Immune Resistance in the Prevention Or Treatment of Induced Neoplasias* Michael A.

*Biology of Tumors: Surfaces, Immunology, and Comparative Pathology* Frederick Becker, 2013-04-17 As was shown in the first two volumes of this series great strides have been made in identifying many of the agents or classes of substances responsible for carcinogenesis and in delineating their interactions with the cell Clearly the aim of such studies is that once identified these agents can be eliminated from the environment Yet despite these advances and the elimination of some important carcinogenic agents one major problem exists It is a constant monitor of all oncologic study and diminishes the importance of every experiment and of every clinical observation As we noted earlier that problem is our inability to define the malignant cell It is through studies of the fundamental biology of tumors that we seek this definition A vast amount of information has been gathered which describes what this cell does and to a lesser extent how it does it But the why evades us We have been unable to define the malignant cell save in broad terms by comparing it to its normal counterpart The major problem appears to be that the malignant cell does so much It is a chimera mystifyingly composed of normal activities and structures of phenotypic schizophrenia with embryonic fetal and adult characteristics and occasionally a hint of an

unclassifiable capacity unique to malignant cells      *Symposium on Ovarian Carcinoma [held at Reston, Virginia, November 15 and 16, 1974]*, 1975      *Cancer Active Immunotherapy* G. Mathe, 2012-12-06 I would like to thank all my co workers who have collaborated with me from 1963 until now in biological and clinical research in the field of cancer active immunotherapy of its immuno prevention and immunorestitution They will often be quoted in this book I am particularly grateful to those who have helped me to write it by reviewing some chapters D BELPOMME J F DOR IRENE FLORENTIN A GOUTNER I J Hm R HUCHET and MARIE CHRISTINE SIMMLER I also thank NICOLE VRIZ MARIE CLAUDE SCHNEIDER FENELLARIS ELEY
