Role Of Labour Mobility And Informal Networks For Knowledge Transfer:

The Role of Labour Mobility and Informal Networks for Knowledge Transfer Dirk Fornahl, Christian Zellner, David B. Audretsch, 2006-01-17 The purpose of this volume is to analyze the microfoundations of knowledge spillovers The microeconomic analysis of spillovers leads to the insight that the spillover and flow of knowledge is not at all automatic Instead this volume suggests that a filter exists between knowledge and its economic application The focus of this volume is on several key mechanisms that serve to reduce this filter and facilitate the flow of knowledge In particular the volume draws on an emerging literature identifying the role of knowledge spillovers to investigate significance of labor mobility and informal networks as mechanisms facilitating the flow of knowledge No field in economics has dealt extensively with the microeconomics of knowledge spillovers This volume brings together scholars from a broad spectrum of fields including labor economics regional economics the economics of innovation and technological change and sociology to introduce new insights yielded from the microfoundations of knowledge spillovers **Benzodiazepines II** Harald Schütz, 1989 Beyond Territory Harald Bathelt, Maryann Feldman, Dieter F. Kogler, 2012-03-29 The main purpose of the book is to discuss new trends in the dynamic geography of innovation and argue that in an era of increasing globalization two trends seem quite dominant rigid territorial models of innovation and localized configurations of innovative activities The book brings together scholars who are working on these topics Rather than focusing on established concepts and theories the book aims to question narrow explanations rigid territorializations and simplistic policy frameworks it provides evidence that innovation while not exclusively dependent on regional contexts can be influenced by place specific attributes The book will bring together new empirical and conceptual work by an interdisciplinary group of leading scholars from areas such as economic geography innovation studies and political science Based on recent discussions surrounding innovation systems of different types it aims to synthesize state of the art know how and provide new perspectives on the role of innovation and knowledge creation in the global political economy *Innovation, Growth and Competitiveness* Peter Nijkamp, Iulia Siedschlag, 2010-12-01 This book investigates dynamic regions in the context of greater global interaction in a world economy increasingly driven by knowledge and innovation It offers novel empirical evidence on the underlying factors of the growth performance of these spaces In particular the following questions are addressed What role is there for research education and innovation in the development strategies of the dynamic growth regions What are the risks and consequences of dynamic growth on patterns of world growth and development competitiveness inequalities and convergence What development strategies should be promoted at national and international levels to promote a growing and more sustainable world economy What are the implications of the emerging new competitors for Europe s competitiveness Using an innovative integrated framework of analysis the contributions in this book combine a wide array of complex theoretical and methodological approaches **Social Networks, Innovation and the Knowledge Economy** Isabel Salavisa, Margarida

Fontes,2012-07-26 In this book the authors illustrate how social networks can play a very significant role in the technological catch up process in moderate innovative countries Using an innovative approach to the study of entrepreneurship in knowledge intensive sectors the book analyses the role of social networks in the access and deployment of the variety of competences and resources required for the successful creation of knowledge intensive companies which has not yet been studied sufficiently in this context *Handbook of Research on Innovation and Clusters* Charlie Karlsson,2008 This volume is an important step in furthering the discussion about how cluster strategies work and the implications for theory and policy Jennifer Clark Review of Regional Studies The role of innovations and clusters has increasingly dominated local and regional development policies in recent decades This authoritative and accessible Handbook considers important aspects of high tech clusters analyses insightful cluster case studies and provides a number of recommendations for cluster policies The chapters in this Handbook are written by international experts in the field and present evidence of the scope effects and potential of clusters as concentrations of innovative activities The authors emphasize that cluster development is not the only option for local and regional development and argue that for cluster policies to be worthwhile supporting policies in fields such as education R D transportation and communication infrastructure must accompany most cluster policies Furthermore several contributions stress that clusters often develop along a life cycle that may end with decline and even the disappearance of clusters Consequently this Handbook provides the basis for improving both research on innovation and clusters and the formulation and implementation of cluster policies Furnishing the reader with rich comprehensive discussion of innovations and clusters this Handbook will be an essential source for researchers and academics in the field as well as policymakers planners and specialists development experts and agencies and consultants **Innovation in General Purpose**

Technologies : How Knowledge Gains when It Is Shared Nina Teichert,2013 This book tackles the different aspects of the creation and transmission of knowledge in the context of the characteristics of a general purpose technology Nanotechnology is investigated as showcase example Particular emphasis is put on the role of the composition of knowledge as well as the corresponding knowledge spillovers on the one hand and on the concrete impact of collaboration and knowledge sharing in innovator networks on the other hand **Managing Networks of Creativity** Fiorenza Belussi,UDO HERMANN STABER,2012-02-27 The aim of the Managing Networks of Creativity is to improve our understanding of creativity and the management of creativity as discussed in the fields of management including strategic management organization science organizational behaviour and entrepreneurship economics sociology regional studies and political science While research on creativity has made several important contributions to the theoretical literature little attention has been paid to the development and testing of formal theoretical models especially in those cases where creativity is the result not so much of individual behaviour than the outcome of collective efforts connecting individuals in organizations social networks projects geographic clusters and so forth The proposed volume includes studies both conceptual and empirical

which as a whole deconstruct the concept of creativity and the management of creativity by identifying specific situations contexts firms clusters and districts in which creative processes evolve The reader is provided with in depth discussions of theoretical issues and a range of descriptive cases and survey data that the authors use to explore or test concepts and models Overall the volume aims to integrate current debates concerning the role of creativity and innovation in economic and social development
