of Higher Education Michael A. Peters, 2007-01-01 Prophetically almost thirty years ago Jean Fran ois Lyotard forecast the end of the modern research university based on Enlightenment principles He envisaged the emergence of technical institutes in the service of the information rich global multinationals This book reflects on the post war Western university and its discourses charting the crisis of the concept of the modern university First it examines the university within a global networked economy second it adopts poststructuralist perspectives in epistemology politics and ethics to appraise the role of the contemporary university third it introduces the notion of development in a critical fashion as a way of explaining its potentially new regional and international learning roles fourth it analyzes the rise of global science and the disciplines in the context of the global economy and finally it raises Lyotard s logic of performativity and the assessment of research quality within a neoliberal economy linking it firmly to the question of freedom and the republic of science

**The New Economy and Economic Growth in Europe and the US** David B. Audretsch, Paul J.J. Welfens, 2013-06-29 The strong productivity growth of the US and Scandinavian countries in Europe in the 1990s has raised the question whether the ICT sector information and communication technology that is computers plus telecommunications plus digital services is the new driving engine of high growth in leading OECD countries Judging by the empirical evidence for the US including a new study by McKinsey which gives mixed evidence it is still too early to clearly dismiss Robert G Gordon s hypothesis that the acceleration of US output growth is due to cyclical factors and increased productivity growth in the computer sector The counter hypothesis is associated with research by Stiroh and others who argue that there are positive productivity spillover effects from ICT to other sectors Indeed it is not clear ex ante whether mainly the Old Economy or the so called New Economy stands to benefit most from high innovation rates and strong productivity shifts associated with the spreading of digital services Interestingly the increased economic role of the internet also contributes to the internationalization of the economy since more services have become tradable and growing import competition itself could stimulate productivity growth and thus contribute to higher growth If ICT plays a key role in the new economy there are important implications in the differential degree to which Germany and the US have implemented ICT

Ryerson University     The Economic Institutions of Higher Education J. Patrick Raines, Charles G. Leathers, 2003-01-01

Working within the context of the evolutionary institutional transformation of higher education the authors trace the development of an economic model by which the behavioral tendencies of modern universities can be evaluated That model is expanded to provide insights to the following questions Why do universities compete and how do they develop and implement their competitive strategies How do universities make critical institutional decisions about operational missions academic policies and internal resource allocation Do universities efficiently and effectively pursue the special social functions assigned to them Patrick Raines and Charles Leathers present an integrated coherent theory to explain the behavior of universities and provide a realistic economic model that predicts how universities allocate their scarce educational resources This alternative view is contrasted with the mainstream explanations of university behavior based on the maximization of student welfare or faculty influences The authors extend the existing literature on the operation of universities by presenting a history of the evolution of the modern entrepreneurial universities as well as an explanation of academic capitalism This absorbing volume will appeal to anyone interested in the history of economic thought or the history of education Scholars of Veblen Smith and Malthus will be fascinated by their individual and comparative theories of the purpose and failures of higher education
