Roller-Compacted Concrete Dams CIGB ICOLD, 2020-12-14 ICOLD Bulletin 177 Roller Compacted Concrete Dams presents the state of the art on roller compacted concrete technology for dams incorporating the advances of the RCC technology for dams over the last 15 years since the previous Bulletin on the topic was released in 2003 Hence the present ICOLD Bulletin 177 supersedes ICOLD Bulletin 126 Roller compacted concrete dams State of the art and case histories published in 2003 and ICOLD Bulletin 75 Roller Compacted Concrete for Gravity Dams published in 1989 While roller compacted concrete technology could have still been considered a new technology in 2003 it is now true to say that construction by roller compaction has become the standard approach for large concrete gravity dams This Bulletin addresses all aspects of the planning design construction and performance of RCC in dams Mixture proportioning and quality control are discussed and a comprehensive listing of references is included Many aspects of RCC in dams have become better understood since the publication of Bulletin No 126 and the present Bulletin contains less information on the particular approaches applied in different countries but includes more comprehensive information particularly in relation to design mixture proportioning and construction With greater understanding it has further been possible to highlight more definitively the requirements of successful RCC dams as well as the pitfalls and difficulties that can be associated with RCC dam design and construction Le Bulletin CIGB 177 intitulé Barrages en Béton Compacté au Rouleau présente les dernières avancées en matière de technologie du béton compacté au rouleau pour les barrages intégrant les progrès de la technologie BCR pour les

barrages au cours des 15 dernières années depuis que le dernier bulletin sur le sujet a été publié en 2003. Par conséquent le bulletin 177 remplace le bulletin 126 Barrages en béton compact au rouleau Technique actuelle et exemples publié en 2003 et le bulletin 75 Béton compact au rouleau pour barrages poids Technique actuelle publié en 1989. Alors que la technologie du BCR pourrait encore être considérée comme une nouvelle technologie en 2003, il est maintenant vrai de dire que la construction par le compactage par rouleaux est devenue l'approche standard pour les grands barrages poids en béton. Ce bulletin aborde tous les aspects de la planification, de la conception, de la construction et de la performance du BCR dans les barrages. Le dosage du mélange et le contrôle de la qualité sont discutés et une liste exhaustive des références est incluse. De nombreux aspects du BCR dans les barrages sont mieux compris depuis la publication du Bulletin n° 126. Le présent bulletin contient moins d'informations sur les approches particulières appliquées dans différents pays mais comprend des informations plus complètes, notamment en ce qui concerne la conception, le dosage du mélange et la construction. Avec une plus grande compréhension, il est possible de mettre en évidence les exigences des barrages en BCR réalisés ainsi que les pièges et les difficultés qui peuvent être associés à la conception et à la construction du barrage en BCR.
