Satellite Technology In Education:

Satellite Technology in Education John K. Gilbert, Annette Temple, Craig Underwood, 2023-12-22 *Satellite Technology in Education* 1991 provides a coherent introduction to the potential of satellite technology in education. It begins with a brief technical history of some of the different systems, making distinctions between remote sensing, telecommunications, and amateur radio satellites. It then examines the uses of satellite technology in the teaching of geography and environmental studies, languages, science, and information technology. The book goes on to look at the response of different sectors, including schools and teacher education, and higher education establishments, and concludes with a discussion of legal issues and an analysis of the resources needed to realize the impact of satellites on education.
