Raphael-Seraphin Kutota Basisa, 2024-01-03 About the Book In some way or form this book is unassumingly a nicer and a more logical organization and interpretation of compounding existing religious writings from a variety of walks of life Herein they are presented as proof drawn synthetically from those multitude of intellectual sources written over the last 4 000 years evidencing that the central figure of the persona translated as the reincarnation of almighty God of Israel himself in Christian literature is simply another Extraterrestrial Alien visiting Planet Earth for a purpose Another visitor just like those well known Anunnaki the Elohim the Nephilim the Sons of God the Watchers the renegade Angels or other entities over several millennia ago And in the many ways how it is related to the current humanity s most pressing problem of whether we are alone and unique in the Cosmos as it is linked to the much witnessed UFO encounters phenomenon It also well outlined the latent consequences resulting from what is presented as postulate About the Author Raphael Seraphin Kutota Basisa currently resides in Lynn Massachusetts He would consider himself a futurist a researcher a world s concerned citizen and a great human being He is a chemical engineer by training and earned an MBA and an ABD in Applied Management and Public Policy He has written and published several technical and non technical documents commentaries articles papers and other books along the subjects of his expertise He believes in extraterrestrial life in regard to religion Basisa is a person whose research helped to recognize early on the theory that we are all descendants of Extraterrestrials and Cosmic religiosity should be recognized in modern theology **Hidden History** Gerry Docherty, James MacGregor, 2013-07-04 Think you know about British history and the causes of the First World War Think again This fascinating and gripping study of events at the turn of the Twentieth Century is a remarkable insight into how political and social factors that we widely accept to be the causes of The Great War were really just a construct put together by a very small but powerful political elite Thought provoking Docherty and Macgregor do not mince their words their arguments are powerful Britain at War Simply astonishing Reader review Very illuminating Reader review You simply MUST read this book Reader review This is a page turner Reader review Hidden History uniquely exposes those responsible for the First World War It reveals how accounts of the war s origins have been deliberately falsified to conceal the guilt of the secret cabal of very rich and powerful men in London responsible for the most heinous crime perpetrated on humanity For ten years they plotted the destruction of Germany as the first stage of their plan to take control of the world The assassination of Archduke Franz Ferdinand was no chance happening It lit a fuse that had been carefully set through a chain of command stretching from Sarajevo through Belgrade and St Petersburg to that cabal in London Our understanding of these events has been firmly trapped in a web of falsehood and duplicity carefully constructed by the victors at Versailles in 1919 and maintained by compliant historians ever since The

official version is fatally flawed warped by the volume of evidence they destroyed or concealed from public view Hidden History poses a tantalising challenge The authors ask only that you examine the evidence they lay before you End of Days Wendell G. Johnson,2017-07-14 Covering religious traditions ranging from Buddhism to Christianity to Zoroastrianism and modern apocalyptic movements such as Arun Shinrikyo and the Branch Davidians this book addresses prophesied end of days from a breadth of perspectives and includes material on often neglected themes and genres End of Days An Encyclopedia of the Apocalypse in World Religions describes apocalyptic writings in the world s major religious traditions including Judaism Christianity Islam Hinduism and Buddhism The cross referenced entries address ancient traditions Zoroastrianism as one example as well as modern apocalyptic movements such as Arun Shinrikyo the Branch Davidians and the Order of the Solar Temple This book s broad scope offers coverage of overlooked traditions such as Mayan Apocalyptic Norse Apocalyptic Native American eschatological literatures and the Tibetan Book of the Dead Readers seeking detailed information on the eschatological and apocalyptic movements and proponents of End Times can reference entries about individuals such as Harold Camping Jerry Falwell David Koresh of the Branch Davidians and James Jones and the People s Temple This single volume encyclopedia also contains numerous historical entries on subjects such as the Great Disappointment the Great Awakening periods of religious revival Joachim of Flora the Maccabean Revolt and the Plymouth Brethren The influence of apocalyptic ideas far outside the realm of religion itself is documented through entries on film including well known modern movies such as The Hunger Games and Apocalypse Now literature by writers such as Dante and works of fine art like Wagner s Gtterd mmerung The inclusion of entries related to literature film and other art forms further attests to the wide ranging social influence of belief in the end of days **The Secret World of the Victorian Lodging House** Joseph O'Neill,2014-11-30 Criminals drifters beggars the homeless immigrants prostitutes tramping artisans street entertainers abandoned children navvies and families fallen on hard times a whole underclass of people on the margins of society passed through Victorian l The Hidden Lives of Jack the Ripper's Victims Robert Hume,2019-12-19 An in depth look at the lives of the women murdered by the infamous 19th century London serial killer Mary Ann Nichols Annie Chapman Elizabeth Stride Catherine Eddowes and Mary Jane Kelly are inextricably linked in history Their names might not be instantly recognizable and the identity of their murderer may have eluded detectives and historians throughout the years but there is no mistaking the infamy of Jack the Ripper For nine weeks during the autumn of 1888 the Whitechapel Murderer brought terror to London s East End slashing women s throats and disemboweling them London s most famous serial killer has been pored over time and again yet his victims have been sorely neglected reduced to the simple label prostitute The lives of these five women are rags to riches to rags stories of the most tragic kind There was a time in each of their lives when these poor women had a job money a home and a family Hardworking determined and fiercely independent individuals it was bad luck or a wrong turn here or there that left them wretched and destitute Ignored by the press and overlooked by historians it is time their stories

particularly endemic in military research and defence policy surrounding biological and chemical warfare More generally it is hard to exaggerate the role of secrecy in all past biological and chemical warfare programmes and several recent historical surveys of biological and chemical warfare research have emphasised that all state sponsored programmes together with sub state organised activities were cloaked in utmost secrecy Of these research programmes Britain carried out one of the most significant in scale and scope in the twentieth century Yet partly because of the secrecy surrounding the programme there is still little academic literature on its historical development Equally and despite secrecy being a pervasive feature of past and contemporary societies social scientists and historians have paid relatively little scholarly attention to the nature mechanics and effects of secrecy particularly with regard to secrecy in relation to the production and governance of science and technology Drawing on classical sociological writing on secrecy by Simmel Merton and Shils this groundbreaking book by Brian Balmer draws on recently declassified documents to investigate significant episodes in the history of biological and chemical warfare At the same time it draws on more contemporary perspectives in science and technology studies that understand knowledge and social order as co produced within heterogeneous networks of things and people in order to develop a theoretical set of arguments about how the relationship between secrecy and science might be understood

France, Britain and the United States in the Twentieth Century 1900 - 1940 A. Williams,2014-07-15 Why is France so often relegated to the background in studies of international relations This book seeks to redress this balance exploring the relationship between the United States United Kingdom and France and its wider impact on the theory and practice of international relations **Between Freedom and Equality** Barbara Boyle Torrey,Clara Myrick Green,2021 Between Freedom and Equality begins with the life of Capt George Pointer an enslaved African who purchased his freedom in 1793 while working for George Washington s Potomac Company Authors Barbara Boyle Torrey and Clara Myrick Green then follow the lives of five generations of Pointer s descendants as they lived and worked on the banks of the Potomac in the port of Georgetown and in a rural corner of the nation s capital By tracing the story of one family and their experiences Between Freedom and Equality offers a moving and inspiring look at the challenges that free African Americans have faced in Washington DC since before the district s founding **From Red to Green?** Paul Donovan,Julie Hudson,2013-01-11 Written by an economist and an investment professional this book addresses the twin crises that the world is facing in the form of a simultaneous financial and environmental credit crunch Financially consumers are less able to consume now and pay later

Environmentally we may have already reached our credit limit and the bill for past financial and environmental consumption is falling due. Whether the financial credit crunch constrains consumers in a way that will be environmentally supportive, naturally slowing the consumption of finite resources, or hinders any effective resolution of the environmental credit crunch is of crucial importance. Policy responses to the financial crisis are likely to be constrained by the political need to support the economic status quo, and when combined with a global reduction in available investment capital, there are serious challenges ahead if the economic and environmental damage of the environmental credit crunch is to be minimised. This book asks whether financial crunch-induced changes in consumer behaviour will be enough to avoid or reduce the environmental crunch many believe is just round the corner. Donovan and Hudson combine their respective economic and environmental perspectives to address this key question, reviewing this tale of two crunches from the perspective of different economic sectors. The answer to the conundrum this book poses may lie in the only unlimited resource on the planet: human ingenuity.

Magic and Alchemy Robert Michael Place, 2009. The word magic evokes many ideas, from a stage magician performing illusions to the pyrotechnics of witches and wizards depicted in movies and on television. This book covers the history, practices, and philosophies of magic and alchemy in Western history. It also looks at the tools used by magicians and alchemists.

Gray Gold Mark Chambers, 2023-08-18. Winner of the Clark C. Spence Award from the Mining History Association. While the histories of gold, silver, and copper mining and smelting are well studied, lead has not received much scholarly attention despite a long history of both Native American and European desire for the ore. Over time, native peoples made lead ornaments in molds. French and American settlers used lead to form musket balls; red lead became an important production element for flint and crystal production, and white lead was used in making paint until the mid-twentieth century. *Gray Gold* aims to broaden understandings of early colonial and Native American history by turning attention to the ways that mining and its scientific, technological, economic, cultural, and environmental features shaped intercultural interactions and developments in the New World. Backed by remarkable original sources such as firsthand mining accounts, letters, and surveys, Mark Chambers's study demonstrates how early mining techniques affected the culture clash between Native Americans and Europeans, all the while tracking the impact increased mining had on the environment of what would become the states of Illinois and Missouri. Chambers traces the evolution of lead mining and smelting technology through pre-contact America to the amalgamation of aboriginal processes with French colonial development through Spain's short occupation to the Louisiana Purchase and ultimately the technology transfer from Europe to an efficient and year-round standard of practice after American assumption. Additionally, while slavery in early American industry has been touched on in iron manufacturing and coal mining scholarship, the lead mining context sheds new light on the history of that grievous institution. *Gray Gold* adds significantly to the understanding of lead mining and the economic and industrial history of the United States. Chambers makes important contributions to the fields of United States history, Native American and frontier history, mining

and environmental history and the history of science and technology **Key Concepts in the Study of Antisemitism** Sol Goldberg, Scott Ury, Kalman Weiser, 2020-12-02 This volume is designed to assist university faculty and students studying and teaching about antisemitism, racism, and other forms of prejudice. In contrast with similar volumes, it is organized around specific concepts instead of chronology or geography. It promotes conversation about antisemitism across disciplinary, geographic, and thematic lines rather than privileging a single methodological paradigm, a specific academic field, or an overarching narrative. Its twenty-one chapters by leading scholars in diverse fields address the relationship to antisemitism of concepts ranging from Anti-Judaism to Zionism. Each chapter not only traces the history and major scholarly debates around a key concept, it also presents an original argument, points to avenues for further research, and exemplifies a method of investigation.

Frankincense, an ancient incense ingredient, taps into our longing for transcendence, while ambergris embodies our unquenchable curiosity. And exquisite jasmine exemplifies our yearning for beauty, both evanescent and enduring. In addition to providing a riveting initiation into the history, natural history, and philosophy of scent, *Fragrant* imparts the essentials of scent literacy and includes recipes for easy-to-make fragrances and edible, drinkable, and useful concoctions that reveal the imaginative possibilities of creating with and reveling in aroma.
