changes in environment resources and economic base **Shantyboat on the Bayous** Harlan Hubbard, 1990 Between 1802 when the young Kentucky artist William Edward West began to paint portraits while on a downriver journey and 1920 when the last of Frank Duveneck's students worked in Louisville a large number of notable portrait artists were active in Kentucky and the Ohio River Valley In Lessons in Likeness Portrait Painters in Kentucky and the Ohio River Valley 1802 1920 Estill Curtis Pennington charts the course of those artists as they painted a variety of sitters drawn from both urban and rural society The work is illustrated when possible from The Filson Historical Society collection of some four hundred portraits representing one of the most extensive holdings available for study in the region Portraiture involves artists and subjects known as sitters and is an art that combines elements of biography aesthetics and cultural history Private portraits often attract an oral history that enlivens the more colorful aspects of local tradition and culture Public portraits of towering figures such as George Washington Henry Clay and Abraham Lincoln were often reproduced in printed format to satisfy popular demand and subsequently attained an iconic timeless status Lessons in Likeness is organized in two parts Part One the cultural chronology serves as a backdrop to the biographies of the portrait artists This section identifies stylistic sources

and significant historical moments that influenced the artists and their milieus Rather than working in isolation portrait artists were connected to the world around them and influenced by prevailing trends in their trade Early in the nineteenth century for instance Matthew Jouett journeyed to Boston for study with Gilbert Stuart and upon his return to Kentucky painted in a style that subsequently influenced an entire generation Later artists notably Oliver Frazer and William Edward West studied the lessons of Thomas Sully in Philadelphia Sully popularized the lush warmly colored and highly flattering style of portraiture practiced by many of the itinerant artists whose careers were facilitated by the introduction of steam and rail travel The Civil War provoked a dramatic shift in the cultural terrain further augmented by the rise of photography and the emergence of academic art centers Painters who had previously worked with a master painter or learned on their own were now able to study at established schools especially in Cincinnati which became one of the leading centers for the teaching of art in late nineteenth century America Several of the teachers there Frank Duveneck and Thomas Satterwhite Noble in particular had firsthand experience with avant garde European styles notably the realism and naturalism practiced in Munich and Paris in the last quarter of the nineteenth century and then taught in the art schools of New York and Philadelphia Part Two profiles the artists from this area and period who have appeared in previous art historical literature and have an identifiable body of work represented in public and private collections Individual biographies provide details of the artists lives sources for further study and locations of works in public collections

Murray Ledger and Times. *Wendell Berry and the Agrarian Tradition* Kimberly K. Smith, 2014-01-17. Farmer and conservationist Wendell Berry has published more than thirty books, making his name a household word among environmentalists. From his Kentucky farm, Berry preaches and practices stewardship of the land as he seeks to defend the value and traditions of farm life in an industrial capitalist society. A central figure in the greening of American agrarianism, Berry has been an advocate of small farming and traditional values who has tirelessly reminded readers that sustainable agriculture is more than a catchphrase. Kimberly Smith now reveals the depth of his ideas and their relevance for American social and political theory. Berry's central teaching focuses on the fragility of our natural and social worlds. Smith's timely book revisits the problem of living a meaningful life in a world filled with both deadly perils and unimagined possibilities. Hers is the first book to explore the implications of this central tenet and other key aspects of Berry's thought, as well as his overall contribution to environmental theory and politics. Smith shows how the many strands of Berry's thought can be woven together into a coherent agrarian philosophy. Focusing on his relationship to the American agrarian and environmental traditions, she examines how Berry's ecological agrarianism derives from the concept of grace or living in concert with nature and society. Along the way, she defends his social theory against accusations of utopianism, shows how his moral theory subverts the notion of rugged individualism usually associated with farming, and reviews his political theory's argument for decentralized democracy. By assessing Berry's reformulation of democratic agrarianism, Smith goes beyond any previous critiques of his writing, and her exploration of Berry's moral vision shows that such vision is more relevant as America continues to move further away from its agrarian past.
