Nonstate Warfare Stephen Biddle,2022-07-26 How nonstate military strategies overturn traditional perspectives on warfare Since September 11th 2001 armed nonstate actors have received

increased attention and discussion from scholars policymakers and the military Underlying debates about nonstate warfare and how it should be countered is one crucial assumption that state and nonstate actors fight very differently In *Nonstate Warfare* Stephen Biddle upturns this distinction arguing that there is actually nothing intrinsic separating state or nonstate military behavior Through an in depth look at nonstate military conduct Biddle shows that many nonstate armies now fight more conventionally than many state armies and that the internal politics of nonstate actors their institutional maturity and wartime stakes rather than their material weapons or equipment determines tactics and strategies Biddle frames nonstate and state methods along a continuum spanning Fabian style irregular warfare to Napoleonic style warfare involving massed armies and he presents a systematic theory to explain any given nonstate actor s position on this spectrum Showing that most warfare for at least a century has kept to the blended middle of the spectrum Biddle argues that material and tribal culture explanations for nonstate warfare methods do not adequately explain observed patterns of warmaking Investigating a range of historical examples from Lebanon and Iraq to Somalia Croatia and the Vietcong Biddle demonstrates that viewing state and nonstate warfighting as mutually exclusive can lead to errors in policy and scholarship A comprehensive account of combat methods and military rationale *Nonstate Warfare* offers a new understanding for wartime military behavior *The Era Almanack* ,1877 *From Purpose to Impact* Nicholas O'Regan,2024-07-24 To meet the challenge of closing the gap between academic research and industry practice we need a step change in how the business school and the business scholar engages with business This book presents best practice in the methods of broadening successful academic business engagement on a major scale It presents concrete recommendations for setting programmes creating incentives and structuring recruitment that will transform effective academic business engagement Most universities claim to have significant links with industry and the professions but in reality only a limited number of business scholars are engaged with industry A focus on impact presents an additional potential trap confusing promotion of research and tactical tips and tricks with genuine engagement This book explores the increasing number of new and innovative partnerships and collaborative activities and looks at how academics can adapt to and leverage these new opportunities It focuses on the academic as the primary driver of the external relationship and outlines the skills and capabilities needed to proactively develop engagement Finally the book provides a number of examples of best practice from a range of countries Written by senior business scholars and leaders from around the world and with examples of best practice included from leading universities this book gives universities the insight needed to develop a broader range of relationships with businesses and to have genuine engagement and impact in practice
