

A photograph of a desert landscape. A paved road with double yellow lines stretches from the bottom center towards the horizon. The road is flanked by sandy dunes and sparse desert vegetation. The sky is a clear, pale blue. Overlaid on the image are three dark red rectangular boxes containing white text.

There is a time to let
things happen and a time
to make things happen.

Make Things Happen:

How to Make Things Happen Beatriz Muñoz-Seca, 2017-08-21 This book offers models and frameworks to analyze your service delivery systems as a whole. It presents the framework to solve customer problems by delivering the right knowledge at the right time to the right place and take advantage of the efficiency that technology and algorithms offer. Why do so many brilliant plans fail to deliver in practice? Why can't your employees just do what you want them to do? In most cases, because the operations ecosystem in which those plans must be deployed fails to fully understand the problem that needs to be solved. The fourth industrial revolution is seeing advances in Artificial Intelligence industrialize the service sector. But despite the cost cutting that these advances offer, firms are still struggling to stay competitive. That is because they think that cost cutting delivers increased efficiency, whereas it is the other way around: increased efficiency cuts costs. And the heart of efficiency in delivering services is people and their knowledge. As industrialization drives ever more standardized offerings and ever little human contact, it is in those rare moments of human interaction where the greatest opportunity to add or destroy value lies. It is human brains and the knowledge they contain that are best suited to problem solving and individualizing client solutions. The real competitive edge will become the ability to foresee and individualize problem solving. To do this, firms must start thinking of knowledge as inventory: who knows what, who needs to know what and where and when do they need to know it.

What Makes Things Happen Kim Treiger-Bar-Am, 2025-06-30 People consider luck chance fate and freedom to be forces that bring about events This book explores the customs associated with each of these concepts alongside practices rooted in Judaism Sometimes incidents seem to be the result of luck Often no apparent reason lies behind them Indeed people live with uncertainty It is also often supposed that chance causes things to occur In modern science the world is deemed to be governed by randomness Perhaps it is fate that makes things happen Yet the Jewish tradition does not abide by the idea from classical Greece which has continued until today that one's path in life and its endpoint are predetermined by fate Rather in Judaism repentance is an open avenue always People have free will and at any moment can change their behavior for the better In Jewish thought as well as in many modern day notions freedom is presumed to be the real cause of events With freedom someone can choose to act and can make things happen The instances of climate change democracy
