Makers Of North American Botany:

Makers of North American Botany H. B. Humphrey, 2003-01 Makers of North American Botany Harry Baker Humphrey, 1961 Makers of North American Botany [review] Joseph Ewan, 1962 **William Alphonso Murrill: The Naturalist** Ronald H. Petersen, 2025-08-20 For the casual naturalist William Alphonso Murrill's name is associated with a plethora of new species of fungi his mysterious resignation from the New York Botanical Garden his disappearance from New York and rediscovery as a free spirit in Florida Pivotal were his years in New York City of course but the process through which he arrived there the people who acted to shape him and his activities while there leading to his life changing trauma have not been previously adequately summarized Three academic biologists were especially important to his development George Francis Atkinson at Cornell Lucien Marcus Underwood at Columbia and Nathaniel Lord Britton at The New York Botanical Garden Other individuals appeared omnipresent to the story John Torrey John Newberry and Seth Low the latter President of Columbia University and Mayor of New York City The Torrey Botanical Club played an important role in Murrill's integration in the city and the spread of his name to the wider biology community Edna the love of his life and his wife remains a mysterious personage The articulation of forces individuals and the times combined to produce an interesting man attempting to forge his own path as The Naturalist Unlike most academics Murrill left several autobiographical publications often allegorical which furnish material on his developing years George Weber who spent considerable time with Murrill in advanced life penned a memorial from which valuable information has been gathered and Jim Kimbrough 2003 Murrill's successor as mycologist at the University of Florida wrote a more informal sketch of Murrill's last years This book serves as a comprehensive biography of William Alphonso Murrill's fascinating and mysterious life career **A Region of Astonishing Beauty** Roger L. Williams, 2003-05-07 As we approach the bicentennial of the Lewis and Clark Expedition in 2004 attention will inevitably turn to the nineteenth century explorers who risked life and limb to interpret the natural history of the American West Beginning with Meriwether Lewis and his discovery of the bitterroot the goal of most explorers was not merely to find an adequate route to the Pacific but also to comment on the state of the region's ecology and its suitability for agriculture and of course to collect plant specimens In this book Williams follows the trail of over a dozen explorers who botanized the Rocky Mountains and who by the end of the nineteenth century became increasingly convinced that the flora of the American West was distinctive The sheer wonder of discovery which is not lost on Williams or his subjects was best captured by botanist Edwin James in 1820 as he emerged above timberline in Colorado to come upon a region of astonishing beauty *Guide to Historical Research at the National Agriculture Library* Susan Chapman, 1994 **Roscoe Pound and Karl Llewellyn** N. E. H. Hull, 1997 American legal history is traditionally viewed as a succession of discrete schools of thought or landmark court decisions not as the work of individuals Such an approach however hardly does justice to the lives of two of the foremost teachers and theorists of American jurisprudence In Roscoe Pound and Karl Llewellyn Searching for an

American Jurisprudence N E H Hull reconstructs the historical cultural and intellectual context of the work of Pound and Llewellyn bringing to light their private and public relationship as well as the diverse sources from psychology to plant ecology to Icelandic sagas they separately drew upon in making their contributions to the American legal tradition

National Library of Medicine Catalog National Library of Medicine (U.S.),1966 **Indiana Dunes National Lakeshore, West Beach Unit, Proposed Comprehensive Design** ,1975 *Uneasy Careers and Intimate Lives* Pnina G. Abir-Am,Dorinda Outram,1987 These pioneering studies of women in science pay special attention to the mutual impact of family life and scientific career The contributors address five key themes historical changes in such concepts as scientific career profession patronage and family differences in gender image associated with various branches of science consequences of national differences and emigration opportunities for scientific work opened or closed by marriage and levels of women s awareness about the role of gender in science An international group of historians of science discuss a wide range of European and American women scientists from early nineteenth century English botanists to Marie Curie to the twentieth century theoretical biologist Dorothy Wrinch
