## **Making Medical History The Life And Times Of Henry E Sigerist:**

**Making Medical History** Elizabeth Fee, Theodore M. Brown, 2021 In the first half of this century Henry Ernest Sigerist was widely regarded as the world's leading historian of medicine. A brilliant teacher and lecturer, Sigerist made medical history exciting and relevant for a whole generation of young physicians, medical students, historians, and the general public. A Marxist sympathizer and advocate of socialized medicine, he also had an enormous and controversial influence on the medical politics of his time. In *Making Medical History*, historians Elizabeth Fee and Theodore M. Brown bring together individuals from various disciplines, many of whom knew Henry Sigerist, all of whom help to illuminate why thirty-five years after his death he continues to be revered by many public health professionals and medical historians.

**Locating Medical History** Frank Huisman, John Harley Warner, 2006-10-31 With diverse constitutions, a multiplicity of approaches, styles, and aims, is both expected and desired. This volume locates medical history within itself and within larger historiographic trends, providing a springboard for discussions about what the history of medicine should be and what aims it should serve. Jacket

*A Short History of Medicine* Erwin H. Ackerknecht, 2016-05-01 A bestselling history of medicine enriched with a new foreword, concluding essay, and bibliographic essay. Erwin H. Ackerknecht's *A Short History of Medicine* is a concise narrative long appreciated by students in the history of medicine, medical students, historians, and medical professionals, as well as all those seeking to understand the history of medicine. Covering the broad sweep of discoveries from parasitic worms to bacilli and x-rays, and highlighting physicians and scientists from Hippocrates and Galen to Pasteur, Koch, and Roentgen, Ackerknecht narrates Western and Eastern civilization's work at identifying and curing disease. He follows these discoveries from the library to the bedside, hospital, and laboratory, illuminating how basic biological sciences interacted with clinical practice over time. But his story is more than one of laudable scientific and therapeutic achievement. Ackerknecht also points toward the social, ecological, economic, and political conditions that shape the incidence of disease. Improvements in health, Ackerknecht argues, depend on more than laboratory knowledge; they also require that we improve the lives of ordinary men and women by altering social conditions such as poverty and hunger. This revised and expanded edition includes a new foreword and concluding biographical essay by Charles E. Rosenberg, Ackerknecht's former student and a distinguished historian of medicine. A new bibliographic essay by Lisa Haushofer explores recent scholarship in the history of medicine.

**Tommy Douglas and the Quest for Medicare in Canada** Gregory Marchildon, 2024-11-30 How and why was universal health coverage implemented so early in a poverty-stricken province in Canada? Why was its design so faithfully replicated in the national standards that ultimately shaped Medicare across the rest of Canada? Seeking to answer these questions, *Tommy Douglas and the Quest for Medicare in Canada* explores the history of universal health care through the life of Canadian politician Tommy Douglas, identifying the pivotal moments and decisions that led to the establishment of Medicare in Canada. The book traces the origins of Medicare back to the 1930s Depression and its devastating impact on the Prairie populations.

Marchildon examines how Tommy Douglas and a new generation of reformers radicalized by the Depression prioritized socialized health care. The book reveals how as the provincial party leader Douglas leveraged support from both local and external allies to rapidly implement universal hospital insurance and lay the groundwork for a new health system. Despite strong opposition from physician and business lobbies, Douglas continued to pressure the government for federal cost sharing of universal health coverage. Drawing on archival sources including speeches, television broadcasts, and cabinet documents, *Tommy Douglas and the Quest for Medicare in Canada* illuminates how Douglas's vision, leadership, and coalition building among unions were crucial to the successful establishment of Medicare in Canada. **Guardians of Medical Knowledge**

Jennifer Connor, 2000 Jennifer Connor explores the worldview of leaders in American medicine with respect to medical literature, history, libraries, and librarianship. Tracing the first fifty years of the Medical Library Association (MLA) from its conception as a resource for libraries to its post-World War II role as a national professional organization, this thorough study portrays the genesis of the MLA through analysis of its origins, its dominant medical culture, and its intricate network of physician leaders. **The Oxford Handbook of the History of Medicine**

Mark Jackson, 2011-08-25 In three sections, the Oxford Handbook of the History of Medicine celebrates the richness and variety of medical history around the world. It explores medical developments and trends in writing history according to period, place, and theme. *The Word As Scalpel* Samuel W. Bloom, 2002-05-23 A doctor can damage a patient as much with a misplaced word as with a slip of the scalpel. In this statement from Lawrence J. Henderson, a famous physician whose name is part of the basic science of medicine, epitomizes the central theme of *The Word as Scalpel*. If words, the main substance of human relations, are so potent for harm, how equally powerful they can be to help if used with disciplined knowledge and understanding. Nowhere does this simple truth apply more certainly than in the behavior of a physician. Medical Sociology studies the full social context of health and disease: the interpersonal relations, social institutions, and the influence of social factors on the problems of medicine. Throughout its history, medical sociology divides naturally into two parts: the pre-modern, represented by various studies of health and social problems in Europe and the United States until the second World War, and the modern post-war period. The modern period has seen rapid growth and the achievement of the full formal panoply of professionalism. This engaging account documents the development of professional associations, official journals, and programs of financial support, both private and governmental. Written by a distinguished pioneer in medical sociology, *The Word as Scalpel* is a definitive study of a relatively new but critically important field. **The Oxford Handbook of Disability History**

Michael A. Rembis, Catherine Jean Kudlick, Kim E. Nielsen, 2018 The Oxford Handbook of Disability History features twenty-seven articles that span the diverse global history of the disabled from antiquity to today. , **Shifting Boundaries of Public Health** Susan Gross Solomon, Lion Murard, Patrick Zylberman, 2008 European public health was a playing field for deeply contradictory impulses throughout the twentieth century. In the 1920s, international agencies were established with great fanfare, and postwar

optimism to serve as the watchtower of health the world over Within less than a decade local level institutions began to emerge as seats of innovation initiative and expertise But there was continual counterpressure from nation states that jealously guarded their policymaking prerogatives in the face of the push for cross national standardization and the emergence of original initiatives from below In contrast to histories of twentieth century public health that focus exclusively on the local national or international levels *Shifting Boundaries* explores the connections or zones of contact between the three levels The interpretive essays written by distinguished historians of public health and medicine focus on four topics the oscillation between governmental and nongovernmental agencies as sites of responsibility for addressing public health problems the harmonization of nation states agendas with those of international agencies the development by public health experts of knowledge that is both placeless and respectful of place and the transportability of model solutions across borders The volume breaks new ground in its treatment of public health as a political endeavor by highlighting strategies to prevent or alleviate disease as a matter not simply of medical techniques but political values and commitments Contributors Peter Baldwin Iris Borowy James A Gillespie Graham Mooney Lion Murard Dorothy Porter Sabine Schleiermacher Susan Gross Solomon Paul Weindling and Patrick Zylberman Susan Gross Solomon is professor of political science at the University of Toronto Lion Murard and Patrick Zylberman are both senior researchers at CERMES Centre de Recherche M decine Sciences Sant et Soci t CNRS EHESS INSERM Paris
