Contagion and the State in Europe, 1830-1930 Peter Baldwin,1999-08-19 This book is a groundbreaking study of the historical reasons for the divergence in public health policies adopted in Britain France Germany and Sweden and the spectrum of responses to the threat of contagious diseases such as cholera smallpox and syphilis In particular the book examines the link between politics and prevention Did the varying political regimes influence the styles of precaution adopted Or was it as Peter Baldwin argues a matter of more basic differences between nations above all their geographic placement in the epidemiological trajectory of contagion that helped shape their responses and their basic assumptions about the respective claims of the sick and of society and fundamental political decisions for and against different styles of statutory intervention Thus the book seeks to use medical history to illuminate broader questions of the development of statutory intervention and the comparative and divergent evolution of the modern state in Europe

Public Health and Municipal Policy Making Marjaana Niemi,2016-04-15 Public health policies had a profound impact on urban life in the late nineteenth and early twentieth centuries yet relatively few people took an active interest in the formulation of these policies In this book Marjaana Niemi examines the impact of different political aims and pressures on scientific health policies through the analysis of public health programmes in two case studies one in Birmingham and the other in Gothenburg By examining early twentieth century campaigns concerned with infant welfare and the prevention of tuberculosis the book provides illuminating insights into the relationship between public health and the regulation of urban life Not only does the book analyse the processes whereby different political aims became embedded in these apolitical health campaigns but it also highlights the important part that the campaigns played in urban politics and governance The political aims which public health campaigns advanced are explored by comparing health policies in Britain and Sweden where officials were part of one public health community enjoying close links attending the same conferences and contributing to the same journals The problems they dealt with were often similar and in both countries health authorities claimed scientific grounds for their programmes Yet the policies they pursued were often strikingly different Through examination of two different national approaches the book does justice to the full complexity of the policy making process and illuminates the wide range of factors that affected municipal policies

Victorian England 1837-1901 Josef Lewis Altholz,J. L. Altholz,2002-08-22 This book contains 2 500 bibliographical entries covering most aspects of the history of Victorian England

The Making of Modern England Gilbert Slater,1919

Publics and their health Alex Mold,Peder Clark,Hannah J. Elizabeth,2023-03-07 The COVID 19 pandemic has resulted in a renewed interest in the relationship between public health authorities and the public Particular attention has been paid to problem publics who do not follow health advice This is not a new issue As the chapters

in this collection demonstrate the designation of certain groups or populations as problem publics has long been a part of health policy and practice By exploring the creation and management of these problem publics in a range of time periods and geographical locations the collection sheds light on what is both specific and particular For health authorities publics themselves were often thought to pose problems because of their behaviour identity or location But publics could and did resist this framing There were and continue to be many problems with seeing publics as problems

Making a Social Body Mary Poovey, 1995-11-15 With much recent work in Victorian studies focused on gender and class differences the homogenizing features of 19th century culture have received relatively little attention In *Making a Social Body* Mary Poovey examines one of the conditions that made the development of a mass culture in Victorian Britain possible the representation of the population as an aggregate a social body Drawing on both literature and social reform texts she analyzes the organization of knowledge during this period and explores its role in the emergence of the idea of the social body Poovey illuminates the ways literary genres such as the novel and innovations in social thought such as statistical thinking and anatomical realism helped separate social concerns from the political and economic domains She then discusses the influence of the social body concept on Victorian ideas about the role of the state examining writings by James Phillips Kay Thomas Chalmers and Edwin Chadwick on regulating the poor Analyzing the conflict between Kay's idea of the social body and Babbage's image of the social machine she considers the implications of both models for the place of Victorian women Poovey's provocative readings of Disraeli's *Coningsby* Gaskell's *Mary Barton* and Dickens's *Our Mutual Friend* show that the novel as a genre exposed the role gender played in contemporary discussions of poverty and wealth *Making a Social Body* argues that gender race and class should be considered in the context of broader concerns such as how social authority is distributed how institutions formalize knowledge and how truth is defined
