Making Of The Modern Architect And Engineer Origins And Development Of An Occupation

Patrik Schumacher

Making Of The Modern Architect And Engineer Origins And Development Of An Occupation:

The Making of the Modern Architect and Engineer Ulrich Pfammatter, 2000 The very first school for architecture came into being when the Ecole Polytechnique opened its gates in Paris in 1794 and with this the profession of the architect as we understand it today was born Using previously unpublished texts and visual material Ulrich Pfammatter traces in fascinating detail the origins and subsequent development of the scientific and industrial training of architects and engineers He explores the growth of the architecture schools in Paris Karlsruhe Zürich London and the USA and by considering important exponents such as Durand Reynaud Mary Weinbrenner Semper Dufour Klenze Eiffel and Jenney he provides a detailed exposition of this important chapter in civil engineering and architectural history **Critical Care** Angelika Fitz, Elke Krasny, Architekturzentrum Wien, 2019-06-18 How architecture and urbanism can help to care for and repair a broken planet essays and illustrated case studies Today architecture and urbanism are capital centric speculation driven and investment dominated Many cannot afford housing Austerity measures have taken a disastrous toll on public infrastructures The climate crisis has rendered the planet vulnerable even uninhabitable This book offers an alternative vision in architecture and urbanism that focuses on caring for a broken planet Rooted in a radical care perspective that always starts from the given in the midst of things this edited collection of essays and illustrated case studies documents ideas and practices from an extraordinarily diverse group of contributors Focusing on the three crisis areas of economy ecology and labor the book describes projects including village reconstruction in China irrigation in Spain community land trust in Puerto Rico revitalization of modernist public housing in France new alliances in informal settlements in Nairobi and the redevelopment of traditional building methods in flood areas in Pakistan Essays consider such topics as ethical architecture land policy creative ecologies diverse economies caring communities and the exploitation of labor Taken together these case studies and essays provide evidence that architecture and urbanism have the capacity to make the planet livable again Essays by Mauro Baracco Sara Brolund de Carvalho Jane Da Mosto Angelika Fitz H l ne Frichot Katherine Gibson Mauro Gil Fournier Esquerria Valeria Graziano Gabu Heindl Elke Krasny Lisa Law Ligia Nobre Meike Schalk Linda Tegg Ana Carolina Tonetti Kim Trogal Joan C Tronto Theresa Williamson Louise Wright Case studies aaa atelier d architecture autog r e Ayuntamiento BCN Kashef Mahboob Chowdhury Urbana C clics Space Community Ecology CAVAA arquitectes Care Repair Tandems Vienna including Gabu Heindl Zissis Kotionis Phoebe Giannisi rotor Meike Schalk Sara Brolund de Carvalho Cristian Stefanescu Rosario Talevi and many others Colectivo 720 Estudio Teddy Cruz Fonna Forman EAHN Emergency Architecture Human Rights Fideicomiso de la Tierra del Ca o Mart n Pe a CLT Anna Heringer Anupama Kundoo KDI Kounkuey Design Initiative Lacaton Vassal Yasmeen Lari muf architecture art Paulo Mendes da Rocha MMBB RUF Rural Urban Framework Studio Vlay Streeruwitz De Vylder Vinck Taillieu Xu Tiantian DnA Design and Architecture ZUSammenKUNFT Berlin Copublished with Architekturzentrum Wien **Design Dispersed** Burcu Dogramaci, Kerstin

Pinther,2019-06-13 Design Dispersed pursues the complex and heterogeneous connections between migration and design in the 20th and 21st centuries The edited volume gathers contributions by international researchers and curators on the question of how design practices and historical objects articulate respond to and critically reflect on migration flight and displacement Besides a collage which highlights the aesthetic effects resulting from the networking overlapping and mixing of forms another strand of the book looks at the political and social dimensions of design How are design objects material modes of a critical inquiry on movements of people and things What role do object trajectories play in the migr movements of the 1930s and 1940s Other texts follow the question of how migrants and refugees form their experience and political fight for acceptance into design and architectural productions A final essay contributes to wordings and projections what vocabulary do we need in order to adequately think and write about a design dispersed **Detailing Worlds** Eric

Bellin,2025-02-06 In the 21st century the word detail appears constantly in discussions of building and we use it in many different ways yet just over 250 years ago detail meant nothing at all particular to the work of architects engineers or builders Detailing Worlds is the first book to examine the origins and evolution of detail as a concept with meanings specific to practices of building By exploring how past meanings and roles were ascribed to detail in different worlds of practice those of academics technicians students engineers and architects Detailing Worlds looks to the future illuminating the ways disciplinary knowledge and the concepts on which it is based evolve and change over time It is a story about how such concepts are slowly but constantly reconceived redefined and transformed by individuals as they interact with one another and how this process is shaped by the ever changing sociocultural and technological dimensions of the world around us Richly illustrated with more than 200 images including figures from rare texts archival student drawings and practitioners construction documents from the 18th through 20th centuries Detailing Worlds ventures to tell the history of a disciplinary specific idea and offer insights about how we think and speak about the practice of building today **Building Theories**

Franca Trubiano,2022-11-25 Building Theories speaks to the value of words in architecture It addresses the author s fascination with the voices of architects engineers builders and craftspeople whose ideas about building have been captured in text It discusses the content of treatises essays articles and letters by those who have been throughout history committed to the art of building In this Building Theories argues for the return of a practice of architectural theory that is set amongst building buildings and builders This journey of close reading reinterprets the words of Vitruvius Alberti de L Orme Le Camus de M zi res Boull e Laugier Rondelet Semper Viollet le Duc H bsch B tticher Berlage Muthesius Wagner Behrendt Gropius and Arup With chapters dedicated to texts from antiquity the Renaissance and the nineteenth century and with a critical eye on architectural theory popularized in the Anglo Saxon world post 1968 readers are introduced to a wider more inclusive definition of architectural ideas Building Theories considers how contemporary scholarship has steered away from the topic of building in its reluctance to admit that both design and construction are central to its concerns In response it argues for a

realignment of architecture with the concept of techn with a dual commitment to fabrica e ratio with a productive return to l art de bien bastir with the accurate translation of the term Baukunst and with an appeal to the architect s composite mind Students practitioners and educators will identify in Building Theories ways of thinking that strive for the integration of design with construction reject the supposed primacy of the former over the latter recognize how aesthetics are an insufficient scaffold for subtending the subject of architectural ethics and accept without reservation that material transformations have always been at the origins of built form

The Autopoiesis of Architecture, Volume II Patrik Schumacher,2012-04-24 This is the second part of a major theoretical work by Patrik Schumacher which outlines how the discipline of architecture should be understood as its own distinct system of communication Autopoeisis comes from the Greek and means literally self production it was first adopted in biology in the 1970s to describe the essential characteristics of life as a circular self organizing system and has since been transposed into a theory of social systems This new approach offers architecture an arsenal of general comparative concepts It allows architecture to be understood as a distinct discipline which can be analyzed in elaborate detail while at the same time offering insightful comparisons with other subject areas such as art science and political discourse On the basis of such comparisons the book insists on the necessity of disciplinary autonomy and argues for a sharp demarcation of design from both art and engineering Schumacher accordingly argues controversially that design as a discipline has its own sui generis intelligence with its own internal logic reach and limitations Whereas the first volume provides the theoretical groundwork for Schumacher s ideas focusing on architecture as an autopoeitic system with its own theory history medium and its unique societal function the second volume addresses the specific contemporary challenges and tasks that architecture faces It formulates these tasks looking specifically at how architecture is seeking to organize and articulate the complexity of post fordist network society The volume explicitly addresses how current architecture can upgrade its design methodology in the face of an increasingly demanding task environment characterized by both complexity and novelty Architecture s specific role within contemporary society is explained and its relationship to politics is clarified Finally the new global style of Parametricism is introduced and theoretically grounded

Encyclopedia of the Social and Cultural Foundations of Education: A-H ; 2, I-Z ; 3, Biographies, visual history, index Eugene F. Provenzo,John P. Renaud,Asterie Baker Provenzo,2009 The Encyclopedia provides an introduction to the social and cultural foundations of education The first two volumes consist of A Z entries featuring essays representing the major disciplines including philosophy history and sociology and a third volume is made up of documentary photographic and visual resources
