The Power of Objects in Eighteenth-Century British America Jennifer Van Horn, 2017-02-23 Over the course of the eighteenth century Anglo Americans purchased an unprecedented number and array of goods The Power of Objects in Eighteenth Century British America investigates these diverse artifacts from portraits and city views to gravestones dressing furniture and prosthetic devices to explore how elite American consumers assembled objects to form a new civil society on the margins of the British Empire In this interdisciplinary transatlantic study artifacts emerge as key players in the formation of Anglo American communities and eventually of American citizenship Deftly interweaving analysis of images with furniture architecture clothing and literary works Van Horn reconstructs the networks of goods that bound together consumers in Boston New York Philadelphia and Charleston Moving beyond emulation and the desire for social status as the primary motivators for consumption Van Horn shows that Anglo Americans material choices were intimately bound up with their efforts to distance themselves from Native Americans and African Americans She also traces women's contested place in forging provincial culture As encountered through a woman's application of makeup at her dressing table or an amputee's donning of a wooden leg after the Revolutionary War material artifacts were far from passive markers of rank or political identification They made Anglo American society

Daniel Defoe and the Representation of Personal Identity Christopher Borsing, 2016-08-25 The concept of a personal identity was a contentious issue in the early eighteenth century John Locke's philosophical discussion of personal identity in *An Essay Concerning Human Understanding* fostered a public debate upon the status of an immortal Christian soul This book argues that Defoe like many of this age had religious difficulties with Locke's empiricist analysis of human identity In particular it examines how Defoe explores competitive individualism as a social threat while also demonstrating the literary and psychological fiction of any concept of a separated lone identity This foreshadows Michel Foucault's

assertion that the idea of man is a recent invention a figure not yet two centuries old a new wrinkle in our knowledge The monograph s engagement with Defoe s destabilization of any definition or image of personal identity across a wide range of genres including satire political propaganda history conduct literature travel narrative spiritual autobiography piracy and history economic and scientific literature rogue biography scandalous and secret history dystopian documentary science fiction and apparition narrative is an important and original contribution to the literary and cultural understanding of the early eighteenth century as it interrogates and challenges modern presumptions of individual identity *In the Looking Glass* Rebecca K. Shrum, 2017-08-30 An utterly fascinating reading of the multiple uses and meanings of mirrors among European Americans African Americans and Native Americans Journal of Social History What did it mean Rebecca K Shrum asks for people long accustomed to associating reflective surfaces with ritual and magic to become as familiar with how they looked as they were with the appearance of other people Fragmentary histories tantalize us with how early Americans people of Native European and African descent interacted with mirrors Shrum argues that mirrors became objects through which white men asserted their claims to modernity emphasizing mirrors as fulcrums of truth that enabled them to know and master themselves and their world In claiming that mirrors revealed and substantiated their own enlightenment and rationality white men sought to differentiate how they used mirrors from not only white women but also from Native Americans and African Americans who had long claimed ownership of and the right to determine the meaning of mirrors for themselves Mirrors thus played an important role in the construction of early American racial and gender hierarchies Drawing from archival research as well as archaeological studies probate inventories trade records and visual sources Shrum also assesses extant mirrors in museum collections through a material culture lens Focusing on how mirrors were acquired in America and by whom as well as the profound influence mirrors had both individually and collectively on the groups that embraced them *In the Looking Glass* is a piece of innovative textual and visual scholarship A superb reflection of the many meanings held by an object usually taken for granted Highly recommended Choice
