Making Of The Slavs:

The Making of the Slavs Florin Curta, 2001-07-12 This book offers an alternative approach to the problem of Slavic ethnicity in south eastern Europe between c 500 and c 700 from the perspective of current anthropological theories The conceptual emphasis here is on the relation between material culture and ethnicity The author demonstrates that the history of the Sclavenes and the Antes begins only at around 500 AD He also points to the significance of the archaeological evidence which suggests that specific artefacts may have been used as identity markers This evidence also indicates the role of local leaders in building group boundaries and in leading successful raids across the Danube Because of these military and political developments Byzantine authors began employing names such as Sclavines and Antes in order to make sense of the process of group identification that was taking place north of the Danube frontier Slavic ethnicity is therefore shown to be a Byzantine invention

Slavs in the Making Florin Curta, 2020-09-28 *Slavs in the Making* takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started It is precisely in this area that sociolinguistics can offer a serious alternative to the language tree model currently favoured in linguistic paleontology The question of how best to explain the spread of Slavic remains a controversial issue This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility It will appeal to scholars and students interested in medieval history migration and the history of Eastern and Central Europe

Slavs in the Making Florin Curta, 2020-09-29 *Slavs in the Making* takes a fresh look at archaeological evidence from parts of Slavic speaking Europe north of the Lower Danube including the present day territories of the Czech Republic Slovakia Poland Belarus Ukraine and Russia Nothing is known about what the inhabitants of those remote lands called themselves during the sixth century or whether they spoke a Slavic language The book engages critically with the archaeological evidence from these regions and questions its association with the Slavs that has often been taken for granted It also deals with the linguistic evidence primarily names of rivers and other bodies of water that has been used to identify the primordial homeland of the Slavs and from which their migration towards the Lower Danube is believed to have started It

is precisely in that area that sociolinguistics can offer a serious alternative to the language tree model currently favored in linguistic paleontology. The question of how best to explain the spread of Slavic remains a controversial issue. This book attempts to provide an answer and not just a critique of the method of linguistic paleontology upon which the theory of the Slavic migration and homeland relies. The book proposes a model of interpretation that builds upon the idea that Common Slavic cannot possibly be the result of Slavic migration. It addresses the question of migration in the archaeology of early medieval Eastern Europe and makes a strong case for a more nuanced interpretation of the archaeological evidence of mobility. It will appeal to scholars and students interested in medieval history, migration and the history of Eastern and Central Europe.

The Making of the Slavs Florin Curta, 2007-04-30 This book offers a new approach to the problem of Slavic ethnicity in southeastern Europe between c 500 and c 700. The author shows how Byzantine authors invented the Slavs in order to make sense of political and military developments taking place in the Balkans. Making extensive use of archaeology to show that such developments resulted in the rise of powerful leaders responsible for creating group identities and mobilizing warriors for successful raids across the frontier. The author rejects the idea of Slavic migration and shows that the Slavs were the product of the frontier.

Imagology Manfred Beller, Joseph Theodoor Leerssen, 2007 How do national stereotypes emerge? To which extent are they determined by historical or ideological circumstances or else by cultural literary or discursive conventions? This first inclusive critical compendium on national characterizations and national cultural or ethnic stereotypes contains 120 articles by 73 contributors. Its three parts offer 1 a number of in depth survey articles on ethnic and national images in European literatures and cultures over many centuries 2 an encyclopedic survey of the stereotypes and characterizations traditionally ascribed to various ethnicities and nationalities and 3 a conspectus of relevant concepts in various cultural fields and scholarly disciplines. The volume as a whole as well as each of the articles has extensive bibliographies for further critical reading. Imagology is intended both for students and for senior scholars facilitating not only a first acquaintance with the historical development, typology and poetics of national stereotypes but also a deepening of our understanding and analytical perspective by interdisciplinary and comparative contextualization and extensive cross referencing.

The Avars Walter Pohl, 2018-12-15 Though the book was first published in German in 1988, this English version includes many revisions and updates and will be the definitive English language study of the Avar empire for years to come. It will be invaluable for those interested in medieval history or in the impact of nomadic steppe empires on sedentary civilizations. Choice. The Avars arrived in Europe from the Central Asian steppes in the mid sixth century CE and dominated much of Central and Eastern Europe for almost 250 years. Fierce warriors and canny power brokers, the Avars were more influential and durable than Attila's Huns yet have remained hidden in history. Walter Pohl's epic narrative translated into English for the first time restores them to their rightful place in the story of early medieval

Europe The Avars offers a comprehensive overview of their history tracing the Avars from the construction of their steppe empire in the center of Europe their wars and alliances with the Byzantines Slavs Lombards and others their apex as the first so called barbarian power to besiege Constantinople in 626 to their fall under the Frankish armies of Charlemagne and subsequent disappearance as a distinct cultural group Pohl uncovers the secrets of their society synthesizing the rich archaeological record recovered from more than 60 000 graves of the period as well as accounts of the Avars by Byzantine and other chroniclers In recovering the story of the fascinating encounter between Eurasian nomads who established an empire in the heart of Europe and the post Roman Christian cultures of Europe this book provides a new perspective on the origins of medieval Europe itself

Becoming Slav, Becoming Croat Danijel Dzino, 2010-08-03 Late antique identities from the Western Balkans were transformed into new Slavic identities after c 600 AD It was a process that is still having continuous impact on the discursive constructions of ethnic and regional identities in the area Building on the new ways of reading and studying available sources from late antiquity and the early Middle Ages the book explores the appearance of the Croats in early medieval Dalmatia the southern parts of modern day Croatia Bosnia and Herzegovina The appearance of the early medieval Croat identity is seen as a part of the wider process of identity transformations in post Roman Europe the ultimate result of the identity negotiation between the descendants of the late antique population and the immigrant groups

Oxford Handbook of Medieval Central Europe Nada Zečević, Daniel Ziemann, 2022 A unique comparative presentation of a region that is often considered forgotten this handbook provides a variety of expertly informed perspectives on life and society in medieval Central Europe and its dynamic interactions across the continent

Interrogating the 'Germanic' Matthias Friedrich, James M. Harland, 2020-11-23 Any reader of scholarship on the ancient and early medieval world will be familiar with the term Germanic which is frequently used as a linguistic category ethnonym or descriptive identifier for a range of forms of cultural and literary material But is the term meaningful useful or legitimate The term frequently applied to peoples languages and material culture found in non Roman north western and central Europe in classical antiquity and to these phenomena in the western Roman Empire's successor states is often treated as a legitimate all encompassing name for the culture of these regions Its usage is sometimes intended to suggest a shared social identity or ethnic affinity among those who produce these phenomena Yet despite decades of critical commentary that have highlighted substantial problems its dominance of scholarship appears not to have been challenged This edited volume which offers contributions ranging from literary and linguistic studies to archaeology and which span from the first to the sixteenth centuries AD examines why the term remains so pervasive despite its problems offering a range of alternative interpretative perspectives on the late and post Roman worlds
